

Monroe Community College

STATE UNIVERSITY OF NEW YORK

Bio Information for Mehmet Argin

Candidate, Dean of Career Technical Education

Mehmet Argin graduated from Arizona State University with a Ph.D. in Electrical Engineering. He earned his M.S. in Electrical Engineering from Yildiz Technical University.

Dr. Argin is currently the Dean of Global Energy Center of Excellence at Houston Community College System. He has been at this role for 3 years. Prior to that, Mehmet served as Associate Dean for Engineering School, Chair for Electrical and Computer Engineering Doctorate Program, and Assistant Professor for the Department of Electrical and Electronics Engineering for Mevlana University.

In addition to his leadership and teaching experiences at higher education institutes, Dr. Argin served as an administrator in STEM focused K-12 public school system over 8 years in Arizona and California. As an administrator at higher education and K-12 charter school systems, Mehmet gained valuable experience in curriculum and budget development, creating partnership, finding resources, leading diverse staff, overseeing academic programs, communicating effectively with all the stakeholders, and preparing students for their future career.

Mehmet has over 12 years of high-level management experience at higher education institutes and K-12 public school systems. He is familiar with the expectations of the dean position at any CTE program, and believes his strong professional background as a leader will bring Monroe Community College a great contribution.
