Advanced Level Practical Examination RANDOM BASIC SKILLS BLEEDING - WOUNDS - SHOCK

Candidate: _____ Examiner: _____
Date: _____ Signature: _____
Time Start: _____ Time End: _____

Takes or verbalizes infection control precautions	1	
Applies direct pressure to the wound	1	
Elevates the extremity	1	
Applies pressure dressing to the wound	1	
Bandages wound	1	
Note: The examiner must now inform the candidate that the wound is still continuing to bleed. The second dressing does not control bleeding.		
Locates and applies pressure to appropriate arterial pressure point	1	
Note: The examiner must indicate that the victim is in compensatory shock.		
Applies high concentration oxygen	1	
Properly positions patient (supine with legs elevated)	1	
Prevents heat loss (covers patient as appropriate)	1	
Note: The examiner must indicate that the victim is in profound shock. Medical control has ordered application and inflation of the MAST (PASG)		
Removes clothing or checks for sharp objects	1	
Quickly assesses areas that will be under the MAST (PASG)	1	
Positions MAST with top of abdominal section at or below last set of ribs	1	
Secures MAST around patient	1	
Attaches hoses	1	
Begins inflation sequence (examiner to stop inflation at 15 mm Hg)	1	
Checks blood pressure	1	
Verbalizes when to stop inflation sequence	1	
Operates MAST to maintain air pressure in device	1	
Reassesses vital signs	1	

TOTAL TO PASS 13

TOTAL 19

CRITICAL FAILURE

- ___ Failure to take or verbalize infection control precautions
- ___ Did not apply high concentration of oxygen
- ___ Applies tourniquet before attempting other methods of hemorrhage control
- ___ Did not control hemorrhage or attempt to control hemorrhage in a timely manner
- ___ Inflates abdominal section of MAST (PASG) before the legs
- ___ Did not reassess patient's vital signs after MAST (PASG) inflation
- ___ Places MAST (PASG) on inside-out
- ___ Allows deflation of MAST (PASG) after inflation
- ___ Positions MAST (PASG) above level of lowest rib

You must factually document your rationale for checking any of the above critical items on the reverse side of this form.
