Travel & Tourism ............................................................................... 179-180
June 2008

“What Happened to the Class of 2007?: A Comprehensive Follow-up Study of MCC Graduates” provides critical data that demonstrates the effectiveness of the College’s transfer and career programs. The pages of this report not only reflect the quality and determination of our students but also the excellence and commitment of MCC faculty and staff who so passionately believe in the mission of Monroe Community College.

Since its founding more than four decades ago, MCC has been committed to fulfilling the needs of our community by providing a quality education for all students. Timely feedback from recent graduates, including employment and transfer placements, is an essential component of our ongoing performance audits and strategic decision making efforts.

Last year, 89 percent of MCC graduates who transferred to another college chose one of our region’s four-year colleges and universities. Sixty-eight percent transferred to a SUNY institution. Of those graduates who came to MCC to prepare for a career, 92 percent stayed within the Greater Rochester area and found full-time work in business, communication, technology, and health care.

Student success has always been our highest priority. Each year, the results of this comprehensive study fuel MCC’s continued commitment to our students and to the well-being of the Rochester community.

Thank you for your continued interest in the success of Monroe Community College and the thousands of students we serve each year.

Sincerely,

R Thomas Flynn
President
Follow-Up Study of 2007 Graduates

The information in this study is based upon the responses of 1,883 graduates (72% response rate) of the Class of 2007.

### Communication & Media Arts

The Associate in Science degree in Communication & Media Arts emphasizes writing, speaking, and the presentation of visual information, while providing an excellent foundation in liberal arts and sciences. The communications courses focus on topics such as audience analysis, copyright laws, freedom and ethics of the press and speech, and the impact of communications technology on education, business, and the formation of public opinion. Through laboratory and studio experiences, students create publications, develop visual and broadcast information formats, and become familiar with the equipment used by communications specialists.

---

Information systems professionals play a key and vital role in the management and growth of an organization. Through a combination of computer management and social skills, these professionals become the creative problem-solvers who define and implement the information needs of an organization and develop related organizational structures. The program develops in the students a basic understanding of computer skills and strategies to be applied to the discipline of computer information systems. The foundations are then more fully developed in a baccalaureate program in computer information systems, management information systems, telecommunications, database administration, or other computer systems curricula.
## COMPUTER SCIENCE

Computer Science

Computer Science includes both the study of underlying theories of computing as well as the specific applications of information manipulation and problem-solving. The Computer Science program provides the first two years of instruction for students who plan to transfer to baccalaureate programs at four-year colleges. The program offers a balance of computer science, mathematics, and science courses with sufficient flexibility to accommodate a range of student career interests and the various emphases and requirements of upper division programs.

Criminal Justice

This program provides the first two years of instruction for students who plan to transfer to a bachelor degree program at a four-year college or university. It is appropriate for students interested in advanced education to pursue a career in probation, parole, public safety, or criminal justice planning. It is also an appropriate avenue to public administration and public service degree programs.

Engineering Science

The program in Engineering Science is designed for students planning a career in the engineering professions who intend to transfer to a baccalaureate program in engineering. It provides essentially the same educational experience during the first two years as that of four-year institutions and allows transfer with full junior status. In addition, the program is broadly based so as to fully prepare graduates, upon transfer, to specialize in any of the various fields of engineering such as mechanical, electrical, aerospace, chemical, biomedical, and the like.
## TRANSFER CURRICULUM - A.S.

### Fine Arts

**2007 COLLEGES**
- Fashion Institute of Technology

- Sales Representative
### International Business

This program is designed to prepare students to transfer to a four-year college or university that offers majors in business, international business, marketing, economics, finance, or related areas. The curriculum provides students who are considering a career in international business, commerce, or diplomacy with a solid background in language, culture, international politics, and business. The program provides students with a better understanding of global, political, social, economic, and trade relationships by blending elements of liberal arts and business curricula.

Liberal Arts & Sciences - General Studies

This program is designed for students seeking a large measure of flexibility in selecting courses consistent with their individual needs and interests while simultaneously acquiring a general education foundation in the liberal arts and sciences. Students uncertain about their long-term educational and career plans often find that the General Studies program provides a valuable opportunity to explore and test their interests. Other students with special educational goals relating to either immediate employment upon graduation or further study toward a baccalaureate degree often consider this program to meet their needs.

**TRANSFER CURRICULUM - A.S.**

## Liberal Arts & Sciences - Science

The program in the Liberal Arts & Sciences - Science provides the first two years of preparation for students who plan to transfer and earn a baccalaureate degree in biology, chemistry, environmental science, geosciences, physics, or another career area such as medicine or pharmacy for which good science preparation is needed. The various concentrations within this program identify course sequences that facilitate transfer to upper division colleges and universities.

### Liberal Arts & Sciences - Adolescence Education

This program is designed to support and encourage progress toward a baccalaureate degree in NYS teacher certification for students interested in pursuing teaching as a career. The Liberal Arts & Sciences Adolescence Education degree is specifically for students interested in teaching grade levels 7 through 12.

Preparing to become a teacher is an exciting and challenging endeavor. This course of study provides students with the opportunity to experience the basic fundamentals of teaching in the classroom, while studying various integral aspects of the profession. The course of study also provides students with a balance of coursework between completing Education classes, General Education requirements, and pursuing courses within their selected academic major.

MCC students also have the opportunity to apply for membership into Pi Lambda Theta, the International Honor Society and Professional Association in Education. MCC is the first community college in the nation invited to join this honor society.

---

This program is designed to support and encourage progress toward a baccalaureate degree in NYS teacher certification for students interested in pursuing teaching as a career. The Liberal Arts & Sciences Childhood Education degree is specifically for students interested in teaching grades one through six.

Preparing to become a teacher is an exciting and challenging endeavor. This course of study provides students with the opportunity to experience the basic fundamentals of teaching in the classroom, while studying various integral aspects of the profession. The course of study also provides students with a balance of coursework between completing Education classes, General Education requirements, and pursuing courses within the students’ selected academic major.

MCC students also have the opportunity to apply for membership into Pi Lambda Theta, the International Honor Society and Professional Association in Education. MCC is the first community college in the nation invited to join this honor society.

Accounting: General

The Associate in Applied Science degree in accounting provides students with a strong foundation in management accounting principles, including cost accounting and taxation. Graduates are usually responsible for keeping records of daily financial transactions, making journal entries, and creating balance sheets and reports. Advanced education combined with experience enables individuals to move into more responsible positions such as accountants and auditors, and to specialize in areas such as taxation, investments, costs, budgeting, or internal auditing.

Automotive Technology

The Automotive Technology program combines on-the-job training with classroom instruction to prepare students for careers as automotive technicians. As the automotive industry advances with sophisticated technology and responds to the needs and demands of consumerism and legislation, employment opportunities are increasing for technicians, that is, technicians who are more highly skilled than mechanics of the past. There are also opportunities in management for those who are interested.

# Biotechnology

Biotechnology emphasizes the bioanalytical techniques and materials that are basic to the commercial development of useful products from biological systems and microorganisms. This course of study is recommended for students who wish to prepare for immediate employment in the field of biotechnology and have a strong interest in biology, biochemistry, or applied genetics. Graduates of this program are typically employed in universities, pharmaceutical companies, food processing industries, and a variety of industrial laboratories that engage in the research and development of genetically engineered products.

Business Administration

This program develops the skills and knowledge needed by students who already manage their own business, are contemplating starting their own business, or hold or plan to hold positions in business or marketing. To give students the opportunity to choose a program based on knowledge or previous coursework, there are three options to explore: (1) Entrepreneurship, for those who own their own business or plan to start their own business; (2) Management, for those who plan to hold positions in existing firms; and (3) Marketing, for those preparing to work or currently working in many areas in the field.

Civil Technology

This program is designed to educate students in the basics of design, construction, and operation of structures used by people. From buildings to bridges, dams to drainage ditches, treatment plants to airport terminals, our Civil Technology program prepares technicians for the increasingly complex part they’ll play in building and operating these structures for society. MCC’s program is broad in its course selection, providing studies on the technical level in the traditional main divisions of civil engineering, structures and environmental control.

Note: Students are no longer being admitted into this program.

Computer Systems Technology

The Computer Systems Technology A.A.S. degree program is tailored to meet the growing demand for individuals with the diverse knowledge to maintain, service, evaluate and utilize increasingly sophisticated microprocessor and minicomputer systems. In addition to a strong electronics curriculum, students take specialized courses in computer technology. Students study the analysis and design of electronic circuits, computer logic, computer architecture, and the fundamentals of computer programming. Specific training is provided in: electronic instrumentation, troubleshooting and debugging techniques, computer peripherals, computer maintenance and fault diagnosis, and high-level and assembly language programming.

Construction Technology

All students entering the Construction Technology Department share a common curriculum in their first year. In their second year, they may choose to focus their coursework on highways and structures, environmental, or construction technology. Students are given sufficient familiarity with all specialities and the opportunity to specialize in a given area where they may seek immediate employment and possibly certification.

Those who choose Construction Technology are part of a team responsible for the coordination and implementation of a construction project. Some of the duties include cost estimating, project management, and project scheduling. This specialization combines a knowledge of core courses such as structural design, concrete design, and surveying, and expands on them to include their applications in the construction field.

## Criminal Justice

This program is designed to meet the community’s need for highly trained law enforcement professionals who have the knowledge, skills, and attitude to respect the rights of both the crime victim and the law violator; to safeguard life and property to maintain peace; and to protect the constitutional rights of all people. The Criminal Justice field offers men and women a variety of challenging career opportunities in public and private service at the national, state, and local levels. Twenty- and twenty-five year retirement programs in the field further multiply opportunities for the job entrant. Most law enforcement agencies are Civil Service, with written examinations used as a basis for employment. Further, they have stipulated physical and moral standards. For the college educated person, more opportunities are open for employment.

The Dental Hygiene program prepares students for careers in preventive dentistry through clinical services and dental health counseling. Working under the supervision of a dentist, the hygienist assists the dentist and the patient in providing dental health information and performing preventative dental treatments. Graduates of the program often find employment in private dental offices, clinics, and community health agencies.

## Electrical Engineering Technology

The electronics curriculum is designed to provide technical depth and breadth, and general education in support of the dynamic field of electronics. Students in this program spend over 400 classroom hours learning how to analyze and design a wide variety of electronic circuits and systems. They also log over 500 hours of laboratory time in which they become proficient in the use of industrial-grade equipment that includes: VOM, DVM, dual-trace storage oscilloscope, current probe, logic probe, logic analyzer (7D01), spectrum analyzer, and signature analyzer.

Fire Protection Technology

The Fire Protection Technology program is designed to explore the scientific techniques that may be applied to the practice of fire protection, fire prevention, and fire extinguishment. The objective of the curriculum is to prepare students to meet the challenges of our modern technological society. This challenge may appear in the form of hazardous chemicals and processes, modern urban problems affecting our inner cities, or the ever demanding changes of a mechanical and technological culture so complex as to produce an overwhelming array of fire hazards. Employment opportunities may be found in both industry and commerce as fire protection specialists, industrial inspectors for both public and private agencies, or other diversified occupations, such as safety specialists or emergency medical technicians.

Hospitality Management

This program prepares students for a wide variety of career opportunities within the hospitality industry. Such career choices include, but are not limited to: culinary arts, food service administration, supermarket management, health care and nutrition, hotel technology, golf management, travel and tourism, and physical fitness technology.

The curriculum emphasizes a broad base of industry skills such as technical knowledge, communication and customer relations skills, and creative problem-solving. Cooperative Education provides work-based experience to expand students’ learning opportunities.

Graduates of the Hospitality Management program often begin their careers as manager trainees or supervisors. With experience, they qualify for such positions as Restaurant Manager, Caterer, Sous Chef, Front Office Manager, Convention Sales Representative, Meeting Planner, Tour Operator, Tourism Consultant, Gold Facilities Manager, and Manager of Physical Fitness Facility, Health Club or Spa. Transfer and 2+2 programs are available in all areas.

Note: This program is made up of the formerly individual A.A.S. degree programs of Hotel Technology, Food Services Administration, and Travel & Tourism.

# Manufacturing Technology

The Manufacturing Technology program exposes students to the vast field of manufacturing. The program covers areas such as manufacturing processes, robotics, and design of equipment and factories. Using the computer to plan, develop and implement ideas is a major focus of the program. Computer Integrated Manufacturing (CIM) concepts are presented and practiced in hands-on laboratory courses. Students are often placed directly in positions as technicians in manufacturing, process, plant and facilities engineering departments.

Marketing

2007 EMPLOYERS POSITIONS

2007 COLLEGES PROGRAMS
## Marketing

The Marketing degree is specifically designed to provide the theories and applied skills needed to enter the job market upon graduation. Job opportunities for graduates of the marketing program are available in all types of for-profit and non-profit settings. Business firms and service organizations constantly look for individuals who can contribute to the goals of satisfying consumer needs. Graduates have obtained positions as customer representatives, sales representatives, manager trainees, managers, and customer service representatives. With advanced education and experience, opportunities exist in sales advertising, sales promotion, market research, consumer analysis, retailing, distribution, market planning, customer relations, and sales and marketing management.

Massage Therapy

This two-year Fall entry program is designed to provide students with the education and experience to be a licensed massage therapist in New York State. The curriculum includes extensive study in both western and oriental massage, biological science, health education, and business. Once licensed, graduates can establish their own private practice as a licensed massage therapist (LMT) or assume a staff position as an LMT in a health facility, resort, hotel, or health club.

  - Mechanical Engineering Technology
Mechanical Technology

The Mechanical Technology program prepares students for challenging careers in mechanical design. The mechanical designer requires knowledge in many areas including mechanical drafting, computer-aided drafting and design, machine shop, robotics, and machine components. This program provides a thorough understanding of these concepts as they apply to today's high technology. In particular, the drafting and design courses emphasize the national standards for drafting and geometric dimensioning and tolerancing.

Nursing

The Nursing program prepares qualified men and women for entry into professional nursing practice. Upon completion of the program, graduates are eligible for admission to the licensing examination for Registered Professional Nursing (R.N.). Graduates find themselves well prepared for and successful on these examinations: year after year, 96% to 99% of them pass the licensing examination the first time they take it. Graduates of the program are employed in a variety of health care settings in the Rochester area and in other parts of the country. Many graduates have completed or are working toward higher degrees in nursing.

Office Technology

The widespread use of automated equipment is changing the role of the secretary in the modern office. Today, secretaries are frequently asked to combine word processing skills with traditional tasks such as typing, transcribing, handling correspondence, scheduling appointments, and maintaining files. In some settings, secretaries may perform such specialized work as drafting reports, researching and writing documents, bookkeeping, operating high tech equipment, supervising other employees or managing other minor administrative tasks. MCC’s Office Technology programs are designed to provide students with the skills needed for employment in today’s high technology office environments and in specific settings. Specialized courses combined with a foundation in communications give students the edge in the job market after graduation. The two A.A.S. degree Office Technology options are Executive and Legal.

- Optics (3)
- Business
Optical Systems Technology curriculum offers a unique, comprehensive program which prepares graduates for work in new, rapidly expanding technologies combining optics with electronics, mechanics, and photographic processes. Optical system technicians work with scientists and engineers in research, development, design, production, quality control, test and evaluation of optical components and systems as well as sales and service. Optical Technology is very important to such activities as the space program, astronomy, laser applications, fiber optics, and the search for solar and other new sources of energy.

## 2007 COLLEGES

### PROGRAMS
Precision Machining

This program is designed to prepare students for employment in the precision metal working industry. It provides the academic course work, hands-on skills, and advanced manufacturing processes required by business. Graduates have a working knowledge of advanced manufacturing techniques that make them more valuable to an employer. They are able to enter or advance in such fields as mold making, machine building, tool making, die making, CNC machinist, or other manufacturing areas. This program is offered in partnership with the Rochester Chapter of the National Tooling and Machining Association.
Public Administration

2007 EMPLOYERS POSITIONS

2007 COLLEGES PROGRAMS
# Public Administration

The Public Administration A.A.S. degree program is designed to prepare individuals to work in the public sector. The program stresses the skills, knowledge, and attitudes needed to provide professional service required in public administration, preparing students for careers in state, county, and municipal government or not-for-profit organizations.

### Radiologic Technology

Radiologic Technologists and Diagnostic Radiographers use controlled radiant energy (x-rays) to produce anatomical images on photographic x-ray film. The resulting radiograph is interpreted by a radiologist (specialized physician) and is used to detect injury or disease. The objectives of this program are to prepare entry-level diagnostic radiographers who can produce high quality radiographs, who can interact with patients in a caring manner, and who can accept the responsibility of the profession and effectively carry out the tasks. Graduates are employed by area hospitals, health centers, clinics, radiologists’ private offices, and industry.

### Visual Communications Technology

The Visual Communications Technology program is designed as a specific career path for students interested in gaining employment in fields such as graphic design and printing, or in professional training in photography, filmmaking, and video. The Graphic Arts/Printing option provides students with a foundation in the design and production of graphics and the operation of printing press equipment. The Photography/Television option covers visual principles, materials, equipment and processes, audio production techniques, and electronic image creation.

Automotive Technology - Certificate

2007 EMPLOYERS POSITIONS

2007 COLLEGES PROGRAMS
The Automotive Technology - Certificate program is designed to meet the needs of students who want to enter the workforce as soon as possible. This program combines on-the-job training with classroom instruction to prepare students for careers as automotive technicians. As the automotive industry advances with sophisticated technology and responds to the needs and demands of consumerism and legislation, employment opportunities are increasing for technicians.

## Court Reporting - Certificate

This certificate program is designed to provide students with the education requirements necessary for application for the New York State licensing examination for Certified Shorthand Reporter. Candidates for this examination must complete three years full-time experience as a verbatim reporter, which may be accomplished by working as a freelance hearing reporter. Prospective court reporters must also pass a civil service examination. The computer-aided transcription skills developed in the program prepare students for employment as verbatim freelance hearing reporters, computer-aided transcriptionists, or computer-aided transcription editors.

## Medical Transcription - Certificate

### 2007 EMPLOYERS
- M & E Warehouse, Inc.
- Rochester General Hospital

### POSITIONS
- Office Manager
- Medical Transcriptionist (2)

### 2007 COLLEGES
- Monroe Community College

### PROGRAMS
- Medical Office Assisting
Medical Transcription - Certificate

This one year certificate program prepares students to function as professional medical transcriptionists. Students receive a basic understanding of the language of medicine, advanced skills in word processing and technology, and technical skills in transcription equipment and processes. Upon completion of the program, students are prepared for careers in the medical transcription field including working in physicians offices, hospitality and outpatient clinics, insurance companies, private dictation services, or as independent contractors.
# Office Technology - Certificate

Office Technology - Certificate

There are three different tracks for students in the Office Technology certificate program. The Clerk Typist track prepares students for an entry-level office position involving routine and repetitive clerical tasks. The Medical Office Assistant track is designed to provide students with a firm foundation for the medical office environment. The Information Processing track is a highly intensive program designed to enhance existing computer software application skills.

2007 COLLEGES

PROGRAMS
Optical Systems Technology - Certificate

The Optical Technology Certificate Program prepares students to work in optical activities such as testing, quality control, and production. It provides a background in optics using the eye as a detector, but not incorporating the peripheral disciplines such as electronics and photography. This certificate program is designed for people working in the field or in an allied field, who wish to add optics to their sphere of competence.
# Paralegal Studies - Certificate

## 2007 EMPLOYERS
- Boylan, Brown, Code, Vigdor, & Wilson LLP

Travel & Tourism - Certificate

This program is designed for students who are primarily interested in a travel and tourism concentration without the broad liberal arts background. Graduates of this program have established a basis for a career in the travel and tourism industry, and are qualified for at least entry-level positions in tour companies, travel agencies, tourism bureaus, cruise lines, car rental companies, and hotels.
