March 2005

“What Happened to the Class of 2004?: A Comprehensive Follow-up Study of MCC Graduates” provides critical data that assists MCC faculty and staff in measuring the effectiveness of the College’s transfer and career programs. The pages of this report not only reflect the quality and determination of our students but also the excellence and commitment of MCC faculty and staff who believe in the mission of this College.

For more than 40 years, MCC has been committed to fulfilling the needs of our community by providing a quality education for all students. Timely feedback from recent graduates, including employment and transfer placements, is an essential component of our ongoing performance audits and strategic decision making efforts.

Last year, 71 percent of MCC graduates who transferred to another college chose one of our region’s four-year colleges and universities. Of those graduates who came to MCC to prepare for a career, 89 percent stayed within the Greater Rochester area and found work in business, communication, technology and health care.

Student success has always been our highest priority. Each year, the results of this comprehensive study fuel MCC’s continued commitment to our students and to the well-being of the Rochester community.

Thank you for your continued interest in the success of Monroe Community College and the thousands of students we serve.

Sincerely,

R Thomas Flynn
President
**Follow-Up Study of 2004 Graduates**

The information in this study is based upon the response of 1,818 graduates (71% response rate) of the Class of 2004.

Respondents  N=1,818

**COLLEGE TRANSFER:**

- 46% (840) of all graduates continued their education full time after graduation.
- 57% (1,037) of the graduates transferred either full- or part-time to 136 different colleges & universities.
- Of the 1,037 graduates transferring to other colleges and universities, 71% enrolled in local colleges and universities including:
  - SUNY College at Brockport ......................................................... 265
  - Rochester Institute of Technology ............................................. 130
  - St. John Fisher College ............................................................... 93
  - Nazareth College ........................................................................ 75
  - SUNY College at Geneseo ............................................................ 55
  - Roberts Wesleyan College ......................................................... 29
  - University of Rochester .............................................................. 19
  - Empire State College ................................................................. 12
  - All SUNY units combined, accounted for 49% (487) of transferring graduates.
- 95% of the graduates were either studying or working full or part-time.

**EMPLOYMENT:**

- Graduates were hired by 748 employers.
- Local employers continued to hire the vast majority of our graduates. Of those career and certificate program graduates indicating present full-time employment, 89% were employed locally.
- Of those career and certificate program students employed full-time, 85% were in jobs related to their field of study at Monroe Community College.
- 47% (860) of all graduates were employed in full-time positions after graduation.
- 79% (1,435) of all graduates were employed either full-time or part-time after graduation.

**The Types of Organizations Most Frequently Employing Our Graduates Were:**

- Hotels, restaurants & food service organizations, including grocery stores ........................................... 250
- Retail stores, excluding grocery stores ....................................................................................................... 189
- Hospitals, health care facilities & health care organizations ........................................................................ 183
- City, county, state & US government offices, including local school systems ........................................... 111
- Social service agencies, child care providers & other non-profit organizations ..................................... 88
- Telecommunication, business services & telemarketing companies, including law offices .......... 88
- Heat & air conditioning, manufacturing & assembly companies ............................................................... 87
- Post-secondary schools, colleges or universities ....................................................................................... 63
- Doctors & dentist offices ......................................................................................................................... 54

**The Local Organizations Most Frequently Hiring Our Graduates Were:**

- Wegman’s & Chase Pitkin ........................................................... 76
- University of Rochester, includes Strong Memorial Hospital ................................................................. 71
- Monroe County, includes MCC .............................................. 46
- Rochester General Hospital .................................................. 37
- City of Rochester ....................................................................... 31
- Eastman Kodak ........................................................................ 25

---

Communication & Media Arts

The Associate in Science degree in Communication emphasizes writing, speaking, and the presentation of visual information, while providing an excellent foundation in liberal arts and sciences. The communication courses focus on topics such as audience analysis, copyright laws, freedom and ethics of the press and speech, and the impact of communications technology on education, business and the formation of public opinion. Through laboratory and studio experience, the student will create publications, develop visual and broadcast information formats, and become familiar with the equipment used by communication specialists.
# Computer Information Systems

## 2004 COLLEGES

## POSITIONS
- Network Administrator
- Lens Packager
- Business Systems Analyst
- Software Test Engineer
- Network Technician
- Computer Programmer
## Computer Information Systems

Information systems professionals play a key and vital role in the management and growth of an organization. Through a combination of computer management and social skills, these professionals become the creative problem-solvers who define and implement the information needs of an organization and develop related organizational structures. The program develops in the students a basic understanding of computer skills and strategies to be applied to the discipline of computer information systems. The foundations are then more fully developed in a baccalaureate program in computer information systems, management information systems, telecommunications, data base administration, or other computer systems curricula.

Criminal Justice

This program provides the first two years of instruction for students who plan to transfer to bachelor degree programs at four-year colleges or universities. It is appropriate for students interested in advanced education to pursue a career in probation, parole, public safety, or criminal justice planning. It is also an appropriate avenue to public administration and public service degree programs.

## Transfer Curriculum

### Engineering Science

The program in Engineering Science is designed for students planning a career in the engineering professions who intend to transfer to a baccalaureate program in engineering. It provides essentially the same educational experience during the first two years as that of four-year institutions and allows transfer with full junior status. In addition, the program is broadly based so as to fully prepare graduates, upon transfer, to specialize in any of the various fields of engineering such as mechanical, electrical, aerospace, chemical, biomedical, and the like.

## Liberal Arts & Sciences - Science

The program in the Natural Sciences provides the first two years of preparation for students who plan to transfer and earn a baccalaureate degree in biology, chemistry, environmental science, geosciences, physics, or other career areas such as medicine or pharmacy for which a good science preparation is needed. The various concentrations within this program identify course sequences that facilitate transfer to upper division colleges and universities.

### Liberal Arts & Sciences

This program is designed for students seeking a large measure of flexibility in selecting courses consistent with their individual needs and interest while simultaneously acquiring a general education foundation in the liberal arts and sciences. Students uncertain about their long-term educational and career plans will find that the General Studies program provides a valuable opportunity to explore and test their interests. Other students with special educational goals relating to either immediate employment upon graduation or further study toward a baccalaureate degree should consider this program to meet their needs.

Accounting

The Associate in Applied Science degree in accounting provides students with a strong foundation in management accounting principles, including cost accounting and taxation. Graduates are usually responsible for keeping records of daily financial transactions, making journal entries, and making up balance sheets and reports. Advanced education combined with experience enables individuals to move into more responsible positions as accountants and auditors and to specialize in such areas as taxation, investments, costs, budgeting or internal auditing.
## Apprentice Training: Machine Trades

### 2004 Employers
- Eastman Kodak Company
- Peko Precision Products, Inc.
- Southco, Inc.

### Positions
- Assembly Mechanic; Research & Development
- Machine Operator; Tool Maker
- Tool Maker

### 2004 Colleges
- Monroe Community College
- SUNY University at Buffalo

### Programs
- Liberal Arts; Mechanical Technology
- Mechanical Engineering
APPRENTICE TRAINING: MACHINE TRADES

This Associate of Applied Science Degree program compliments apprentice training by adding theoretical learning in the technologies to the applied learning received on the job. To be eligible for this program, you must be an apprentice or journeyman in the machine trades under the auspices of an appropriate apprenticeship training program.

# Automotive Technology

The Automotive Technology program combines on-the-job training with classroom instruction to prepare students for careers as automotive technicians. As the automotive industry advances with sophisticated technology and responds to the needs and demands of consumerism and legislation, employment opportunities are increasing for technicians; that is, technicians who are more highly skilled than mechanics of the past. There are also opportunities in management for those who are interested.

### Biotechnology

Biotechnology emphasizes the bioanalytical techniques and materials that are basic to the commercial development of useful products from biological systems and microorganisms. This course of study is recommended for students who wish to prepare for immediate employment in the field of biotechnology and have a strong interest in biology, biochemistry, and applied genetics. Graduates of this program may be employed in universities, pharmaceutical companies, food processing industries, and a variety of industrial laboratories engaged in research and development of genetically engineered products.

Business: Financial Services

This program is designed to educate students in basic financial skills including accounting, economics, and business. Students will gain practical experience through the use of industry specific co-ops or internships. Financial services, real estate, banking, brokerage, and insurance are some of the possible career opportunities.

Civil Technology

This program is designed to educate graduates in the basics of design, construction, and operation of structures used by people. From buildings to bridges, dams to drainage ditches, treatment plants to airport terminals, our Civil Technology program prepares the technicians for the increasingly complex part they’ll play in building and operating these structures for society. MCC’s program is broad in its course selection, providing studies on the technical level in the traditional main divisions of civil engineering, structures and environmental control.

Computer Technology

The Computer Technology A.A.S. degree program is tailored to meet the growing demand for individuals with the diverse knowledge to maintain, service, evaluate and utilize increasingly sophisticated microprocessor and minicomputer systems. In addition to a strong electronics curriculum, students take specialized courses in computer technology. Students study the analysis and design of electronic circuits, computer logic, computer architecture, and the fundamentals of computer programming. Specific training is provided in: electronic instrumentation, troubleshooting and debugging techniques, computer peripherals, computer maintenance and fault diagnosis, and high-level and assembly language programming.

Criminal Justice

This program is designed to meet the community’s need for highly trained law enforcement professionals who have the knowledge, skills, and attitude to respect the rights of both the crime victim and the law violator; to safeguard life and property, to maintain peace, and to protect the constitutional rights of all people. The Criminal Justice field offers men and women a variety of challenging career opportunities in public and private service at the national, state, and local levels. Twenty and twenty-five year retirement programs in the field further multiply opportunities for the job entrant. Most law enforcement agencies are Civil Service, with written examinations used as a basis for employment. Further, they have stipulated physical and moral standards. For the college educated person, more opportunities are open for employment.

### Dental Hygiene

The Dental Hygiene program prepares graduates for careers in preventive dentistry through clinical services and dental health counseling. Working under the supervision of a dentist, the hygienist assists the dentist and the patient in providing dental health information and performing preventative dental treatments. Graduates of the program find employment in private dental offices, clinics, and community health agencies.

Electrical Engineering Technology

The electronics curriculum is designed to provide technical depth and breadth, and general education in support of the dynamic field of electronics. Students in this program spend over 400 classroom hours learning how to analyze and design a wide variety of electronic circuits and systems. They also log over 500 hours of laboratory time in which they become proficient in the use of industrial-grade equipment that includes: VOM, DVM, dual-trace storage oscilloscope, current probe, logic probe, logic analyzer (7D01), spectrum analyzer, and signature analyzer.

The Fire Protection Technology program is designed to explore the scientific techniques that may be applied to the practice of fire protection, fire prevention, and fire extinguishment. The objective of the curriculum is to prepare graduates to meet the challenges of our modern technological society. This challenge may appear in the form of hazardous chemicals and processes, modern urban problems affecting our inner cities or the ever demanding changes of a mechanical and technological culture so complex as to produce an overwhelming array of fire hazards. Employment opportunities may be found in both industry and commerce as fire protection specialists, industrial inspectors for both public and private agencies or other diversified occupations, such as safety specialists or emergency medical technicians.

Food Service Administration*

Food Service is a fast-growing, people-oriented service profession with excellent opportunities for career growth. The Food Service Administration A.A.S. degree program provides the knowledge, skills, and attitude necessary for success in all areas of the food service industry. The curriculum emphasizes management principles, and at the same time presents solid background in equipment use and skill training in basic elements of food preparation. Career opportunities are available in all areas of the food service industry including: restaurants, hotels, health care facilities, catering, contract food services, food and equipment sales, industrial and institutional feeding, school food service, and federal regulatory agencies.

*Students are no longer being admitted to the program.

## Hotel Technology

The Hotel Technology program is designed to prepare graduates for entry-level management positions in the hospitality industry. The operation of a modern hotel, motel, or resort is complex and requires knowledge and skills in many diverse areas. Graduates of the Hotel Technology program, depending upon experience, will qualify for positions ranging from entry level to supervisory. Entry level management positions include front desk clerk, night auditor, assistant food and beverage manager, banquet coordinator, bar manager, sales representative, or assistant personnel director. With experience, education, good planning and organizing skills, employees can follow paths leading to hotel general manager.

*Students are no longer being admitted to the program.*

## Manufacturing Technology: Automation/Robotics

The Manufacturing Technology: Automation/Robotics program exposes the student to the vast field of manufacturing. The program covers areas such as manufacturing processes, robotics and design of equipment and factories. Using the computer to plan, develop and implement ideas is a major focus of the program. Computer Integrated Manufacturing (CIM) concepts are presented and practiced in hands-on laboratory courses. Students can be placed directly in positions as technicians in manufacturing, process, plant and facilities engineering departments.

Nursing

The Nursing program prepares qualified men and women for entry into professional nursing practice. Upon completion of the program, graduates are granted an Associate in Applied Science degree and are eligible for admission to the licensing examination for Registered Professional Nursing (R.N.). Graduates find themselves well prepared for and successful on these examinations: year after year, 96% to 99% of them pass the licensing examination the first time they take it. Graduates of the program are employed in a variety of health care settings in the Rochester area and in other parts of the country. Many graduates have completed or are working toward higher degrees in nursing.

### Office Technology

The widespread use of automated equipment is changing the role of the secretary in the modern office. Today, secretaries are frequently asked to combine word processing skills with such traditional tasks as typing, transcribing, handling correspondence, scheduling appointments, and maintaining files. In some settings, secretaries may perform such specialized work as drafting reports, researching and writing documents, bookkeeping, operating high tech equipment, supervising other employees or managing other minor administrative tasks. MCC’s Office Technology programs are designed to provide graduates with the skills needed for employment in today’s high technology office environment and in specific settings. Specialized courses combined with a foundation in communications give students the edge in the job market after graduation. Two A.A.S. degree Office Technology options are - Executive or Legal.

Optical Systems Technology

The Optical Systems Technology curriculum offers a unique, comprehensive program which prepares graduates for work in new, rapidly expanding technologies combining optics with electronics, mechanics and photographic processes. The optical system technician works with scientists and engineers in research, development, design, production, quality control, test and evaluation of optical components and systems as well as sales and service. Optical Technology is very important to such activities as the space program, astronomy, laser applications, fiber optics, and the search for solar and other new sources of energy.

### CAREER CURRICULUM - A.A.S.

#### Precision Machining

This program is designed to prepare graduates for employment in the precision metal working industry. It will provide the academic course work, hands-on skills, and advanced manufacturing processes required by business. Graduates will have a working knowledge of advanced manufacturing techniques that will make them more valuable to an employer. They will be able to enter or advance in such fields as mold making, machine building, tool making, die making, CNC machinist, etc., or employment in other manufacturing areas. This program is offered in partnership with the Rochester Chapter of the National Tooling and Machining Association.

Quality Control technicians explore ways to control the quality of the production process by taking various kinds of measurements of production lines. Their job is to adjust the manufacturing process to keep the defects within acceptable limits. They may also set up quality control programs for companies. Quality Control technicians must be precise and orderly; they must enjoy math and hands-on type of work, and be good at problem-solving. Because Rochester is a parts manufacturing city and many jobs are available in the area, the program emphasizes quality control of parts manufacturing. However, a student may also choose courses which will give them expertise in the quality control of chemical processes, optics, or electronics.

*As of September 2000, this program has been discontinued.

Radiologic Technology

The Radiologic Technology/Diagnostic Radiographer uses controlled radiant energy (x-rays) to produce anatomical images on photographic x-ray film. The resulting radiograph is interpreted by a radiologist (specialized physician) and is used to detect injury or disease. The objectives of this program are to prepare entry-level diagnostic Radiographers who can produce high quality radiographs, who can interact with patients in a caring manner, and who can accept the responsibility of the profession and effectively carry out the tasks. Graduates are employed by area hospitals, health centers, clinics, radiologists’ private offices and industry.

Retail Business Management

Retailers across the country indicate that their single biggest problem is finding and hiring qualified, competent, and creative management personnel. The Retail Business Management program has been designed to meet this need by preparing graduates for a broad spectrum of careers in a variety of retail business settings. Employment opportunities for Retail Business Management graduates are numerous. Specific job areas include: buying, store management, store operations, sales and supervision, personnel, receiving and marketing, and office management. Note: Fashion Buying and Merchandising is now part of this program.

*Students are no longer being admitted to this program.*

**Travel & Tourism**

This program is designed to provide basic knowledge and skills required to succeed in the travel and tourism field. As both discretionary income and leisure time increases, more and more people are turning to travel to add a meaningful dimension to life. Travel and Tourism contributes nearly 150 billion dollars to the U.S. economy each year.

*Students are no longer being admitted to the program.*

The Visual Communications Technology program is designed as a specific career path for students interested in gaining employment in fields such as graphic design and printing, or professional training in photography, filmmaking and video. The Graphic Arts/Printing option provides students with a foundation in the design and production of graphics and the operation of printing press equipment. The Photography/Television option covers visual principles, materials, equipment and processes, audio production techniques and electronic image creation.

Court Reporting - Certificate

**2004 EMPLOYERS POSITIONS**

**2004 COLLEGES PROGRAMS**
### Court Reporting - Certificate

This certificate program is designed to provide students with the education requirements necessary for application for the New York State licensing examination for Certified Shorthand Reporter. A candidate for this examination must complete three years full time experience as a verbatim reporter, which may be accomplished by working as a free lance hearing reporter. Prospective court reporters must also pass a civil service examination. The computer aided transcription skills developed in the program will prepare students for employment as verbatim free lance hearing reporters, computer aided transcriptionists, or computer aided transcription editors.

Food Management/Production - Certificate

The Food Service Management Certificate program is designed for the student who has sufficient work experience in the production and service areas of the food industry and who would like to gain a deeper insight into food management areas for job enrichment, promotional consideration or possible future positions.

The Food Service Production Certificate program is for the student who is primarily interested in a Food Service concentration without the broad liberal arts background. Graduates of this program will be qualified for at least entry-level positions in any of the production or service areas of the food industry.

Medical Transcription - Certificate

This one year certificate program prepares graduates to function as professional medical transcriptionists. Students will receive a basic understanding of the language of medicine, advanced skills in word processing and technology, and technical skills in transcription equipment and processes. Upon completion of the program, graduates will be prepared for careers in the medical transcription field including working in physicians offices, hospitality and outpatient clinics, insurance companies, private dictation services, or as independent contractors.

### Optical Systems Technology - Certificate

The Optical Technology Certificate Program prepares students to work in optical activities, such as testing, quality control, and production. It provides a background in optics using the eye as a detector, but not incorporating the peripheral disciplines, such as electronics and photography. This certificate program is designed for people working in the field, or in an allied field, who wish to add optics to their sphere of competence.

---

The Paralegal Studies Certificate program prepares graduates for entry-level employment as professional paralegals. The professional level paralegal works under the supervision of a lawyer researching the law, investigating facts, preparing drafts of legal documents, and working with clients. They are employed in almost all areas where law related work is performed, i.e., private law firms, government agencies, insurance companies and corporations.
