

## Mathlix N Chill

This Saturday, April 30th from 2 pm to 5 pm in 9 -134, Dr. Santiago, from the Math Dept, and Prof Berg, from the TRS Dept, will be hosting another "Mathlix N Chill" events! This event is a fantastic opportunity for students from different math sections of the same class to work together on any math topics they may be struggling with. Students will be able to meet other classmates who want to have a chill space to focus on math and get the help they need from each other but with instructors present. Think of study sessions but with professors right there just in case something is confusing.

This event is intended to help students realize their full potential when working together. We all have strengths and weaknesses so why not work together to strengthen what we know and what we are unsure of! It will be a fun event that you will not want to miss.

Bring your homework, study guide, old tests, etc so you can work through these questions in your course groups. If you are in MTH 094, 096, 098, 099, 104, 150, 160, or 165, then come on by! We would be happy to work with you. If your course isn't mentioned above, bring some peers from your class and study in a chill, supportive space!

If you have any interest in a future remote session, please email Dr. Santiago at [rsantiago@monroecc.edu](mailto:rsantiago@monroecc.edu) to let her know!

**Together we can pass these math classes!**
