*What is a liberal education? Why is a liberal education important in an age in which colleges prioritize career and technical fields? In what ways is a liberal education crucial to the maintenance of American political institutions?*

*Dr. Thuot will explore the nature and purpose of a liberal arts education. In particular, he will consider two dimensions of liberal learning: development of skills and habits of mind that are appropriate to democratic citizens and pursuing wisdom as an end in itself. Dr. Thuot's discussion is especially relevant given criticisms of American political discourse leading up to this year's presidential election.*
