

Creative Arts Performer/Presentation Proposal

The Creative Arts Mission: Students learn and grow from all experiences encountered while in college. A quality education contributes to the growth of the entire being – cognitively, emotionally and socially. The primary mission of the MCC Creative Arts Program is to develop a student-centered learning initiative that incorporates the combination of arts in a holistic fashion with the educational mission of our institution. Its foundation is built on collaboration and commitment between the Academic and Student Services—classroom instruction linked with the real-life experience.
