P104: Open Educational Resources (OER)

Open Education Resources (OER) are teaching and learning materials (e.g. lesson plans, online tutorials, quizzes, videos, etc.) that are freely available for everyone to use, reuse, adapt, and share. As proponents of the Open Education movement, their creators have chosen to retain few, if any, ownership rights in an effort for others to benefit from shared teacher expertise. Come to this session to learn more about how you can incorporate OER into your teaching practice.

Visit OER Commons to learn more about OER: <http://www.oercommons.org/>

P105: Internet of Things

Many of the items we own such as dishwashers, refrigerators, automobiles and even newly built houses, are equipped with sensors that are gaining the ability to communicate with us and our devices. These advances in technology allow for data to be transferred over networks and do not require human computer interaction. There are chips being developed to monitor human heart activity or monitor blood sugar levels in diabetics. We will show examples of the Internet of Things and open the floor up for conversation so we can discuss how this will be affecting society moving forward.

P106: Google Drive

What is GoogleDrive? Come learn about what it is, and why migrating to the cloud will make your life easier:

- GoogleDrive will allow you to create word processing, spreadsheet, presentations and fillable forms right online
- GoogleDrive will help you keep all your documents (work, personal, other) all in one place, accessible from anywhere)
- GoogleDrive also can be accessed directly from your computer, not through a web browser
- GoogleDrive can be used by almost every mobile device
- GoogleDrive can also make adding content to ANGEL (or Blackboard) much easier.

Bring a laptop if you want; we can add the Google Drive desktop application during this workshop.
