faculty will be on campus to provide  
an overview and answer questions about their

## **Bachelor's Degree in Environmental Design**

This program:

- Addresses the arrangement, appearance, and functionality of towns and cities;
- Teaches skills to understand, analyze, and solve environmental problems, with a view toward community vitality, social fairness, and the design of sustainable environments;
- Is concerned with the way these places are experienced and used, as well as other aesthetic elements that contribute to the quality of community environments.
