

# ANNUAL INNOVATION OF THE YEAR AWARD 2010

---

Every year the League honors outstanding innovations which have been recognized by member institutions as Innovations of the Year. These innovations represent capstone achievements and the continuing renewal of the spirit of innovation and experimentation upon which the League was founded.

### 2010 RECIPIENTS SCHOLARS' DAY

**MATTHEW FOX, MATTHEW HACHEE, JEFFREY KIGGINS, MICHAEL OFSOWITZ, JODI ORIEL,  
SCOTT RUDD, AND CHRISTINE SCHWARTZOTT**

MCC's Scholars' Day was conceived in response to obvious college needs for a single, well-publicized, annual showcase. Its primary purpose is highlighting the accomplished, talented scholarly and creative work and research of many of MCC's students, faculty and staff. The committee creates collaborative planning and supporting efforts from all college divisions and departments to have respected and inspirational scholars of international reach and influence present at Scholars' Day. Deans contribute financial support along with other college shared financial resources to provide an annual Scholars' Day public event featuring top scholars like Edmund Wilson and Jared Diamond sharing their disciplinary research to further broaden interdisciplinary themes of interest to our entire community. Scholars' Day has successfully merged human and financial resources for the benefit of the college and external community.

### CRITERIA

An innovation should meet one or more of the following criteria:

1. **Quality**—Students and/or staff agree that the innovation increases “quality” in the course, program, office, or institution. Evidence of quality may include student ratings or letters of support from colleagues. “Quality” is difficult to measure, but the committees might want to wrestle with criteria that define quality in their colleagues.
2. **Efficiency**—There is evidence that the innovation contributes to a more efficient way of doing things. Student ratings, perceptions of outside consultants, and pre- and post-comparison of time involved are examples of evidence.
3. **Cost Effectiveness**—There is evidence that the innovation adds a value to the institution while at the same time containing or reducing costs. Cost data will serve as evidence.
4. **Replication**—The innovation selected can be replicated in other institutions with a minimum of difficulty.
5. **Creativity**—The innovation should be as original as possible or the adaptation should be creative. The description of the program or letters from experts are examples of evidence.
6. **Timeliness**—The innovation should not be more than five years old in the institution, but it must have been around long enough to have been tested so that it meets most of the criteria.

Each of the League members will announce the Innovation of the Year Program. It is recommended that each League member create a committee to establish criteria and select the award winner. Applications should be encouraged from all areas of the college: instructors (including part-time), administrators, and support personnel; the range of participation is to be determined by each college.
