Summer College for Kids (Grades 1 - 5)

is an all-day program offering the perfect blend of educational and recreational activities for your child. Located on MCC's Brighton Campus, the program is designed to provide children with opportunities to improve their basic skills while continuing their learning over summer vacation. This innovative program includes: Art, Computers, Field Games, Science, Health & Fitness, Leadership Development, Reading, Writer's Workshop, Math Enrichment and a chance to forge new friendships! Call 585-292-2640 for more information.

Summer College Weekly Dates & Themes:

July 7-11 Fit-n-Active

During this first week of camp we will learn about each other's favorite sports, foods and what it means to be "fit and active". We will try out favorite and new sports, try making a healthy, delicious lunch and the week will end with a field trip that will keep us Fit 'n Active.

July 14-18 Weird, Wacky, & Fun Science

Science is all around us! Camp this week will feature mad science experiments, including using chemistry to make cold, delicious ice cream and visits to some of MCC's science labs.

July 21-25 The Great Outdoors

Do you love the outdoors? Then this week is for you. We will go on nature hikes, geocache and learn about sustainability. The week will end with a trip to the Seneca Park Zoo.

July 28-Aug 1 Myths, Legends, and Storytelling

Stories take us to new places and different points in time. Campers will write stories for publishing, and maybe even enter them in a competition. We will make S'mores, tell stories around the "campfire", and take a field trip to the Strong Museum of Play.

Aug 4-8 TechKnow

Technology is changing constantly! We will take visits to the MCC computer lab to explore new and exciting Web 2.0 technologies, and visit Rochester's Makerspace to see a variety of technologies – machining and metal work, electronics, 3D printing and more.

Aug 11-15 Cultural Arts

Do you enjoy taking photos, or maybe painting is more your thing. Be the producer or star of your own show! This week we will explore creative arts – puppetry, photography, music and theatre. We will end the week with the Camp Talent Show.

The Leadership Camp/TLC (Grades 6 - 8)

is for children entering 6th, 7th and 8th grades. TLC provides campers the opportunity to develop leadership skills with MCC Student Life and Leadership staff. Campers will hone their leadership skills and then have the opportunity to apply their new skills by participating in leadership activities at the SCFK program part-time. In addition, campers will see what happens behind the scenes at MCC while exploring future career interests. Team building and self-exploration are the focus of the program. Call 585-292-2640 for more information.

TLC Weekly Dates & Themes:

July 7-11 Amazing Athletes

What does it take to be a professional athlete? Are there other careers that capitalize on a passion and talent for fitness? This week, TLC is exploring careers in sports and health, while also learning about the mind-body connection.

July 14-18 Discovery Science

Science can solve a crime. It can save a life. It can take us to the moon, or to uncharted ocean depths. The scientific mind is always asking questions and considering possibilities--and that's what TLC minds will do this week.

July 21-25 Explore Outdoors

Are you a nature enthusiast? Ever thought about turning that avocation into an occupation? This week, teen leaders will be on the trail of careers with an outdoor focus, from forestry to environmental engineering.

July 28-Aug 1 Out of This World Week

Heard any good stories lately? Chances are, you have--even if you're not a reader. Stories shape our lives in surprising ways. This week, TLC will undertake an epic quest: to find evidence of myths and legends in modern entertainment. We will identify careers that involve storytelling--from narrative design in the gaming industry to digital storyboarding--and create our own myths using modern technology.

Aug 4-8 TechKnow

Do you love technology? We will explore careers in technology through visits to MCC's Applied Technologies Center and then to Rochester's own Makerspace. Machining and tooling, 3-D printing, electronics are just some of the technologies we will learn about.

Aug 11-15 ArtVentures

This week will be an exploration of creativity! TLC will sample different art forms and collaborations, including the visual arts, literature, music, theatre, film, dance and photography. The week will end with the Camp Talent Show.
