JOB DESCRIPTION OVERVIEW:
The Radiologic Technologist performs procedures necessary to produce images for diagnostic interpretation. Images will be evaluated for technical quality according to the departments’ standards and procedures. The Technologist performs a variety of duties under the direction of the providers and RN and will work as part of a health care team to assess patient needs, plan and modify care and implement interventions and support Immediate Care Clinical staff in the provision of client care. Performs all clinical orders in a timely, and accurate manner adhering to all regulatory requirements.

ESSENTIAL DUTIES AND RESPONSIBILITIES:
- Represents Immediate Care by displaying a respectful and caring manner with patients and their families. Independently problem solves and utilizes resources to obtain patient information when patient is unable to communicate. Maintains confidentiality of patient information.
- Interacts calmly, respectfully and in a friendly manner with other representatives of services at Immediate Care. Refers patients to proper resources for Immediate Care policies such as billing support. Assists in clerical duties as needed, functioning as a member of the health care team.
- Work under supervision of the Medical Director and the Site Administrator to provide uncompromising service to patients and community.
- Translates providers orders into appropriate x-ray procedures.
- Prepare patients for examinations, tests or treatments and explains procedures. Positions patient correctly for each examination.
- Operates x-ray equipment to make radiographs for designated portions of the body.
- Selects, identifies and exposes patients using radiation for digital viewing.
- Maintains a clean, safe and orderly work area ensuring the patient radiology room is kept neat and clean and stocked with supplies.
- Utilizes radiology computer system to enter data, technical factors and all coding information.
- Clean and disinfect examination rooms; monitor and ensure appropriate inventory of medical supplies in examination rooms; replenish as required.
- Escort and/or transport patients to examination room and other clinic locations.
- Complies with quality assurance, HIPAA, customer focus, infection control, safety and other policies.
- Contributes to patient care through patient and family education, distributing resource literature and community service recommendations and referrals as needed.
- Participate in development and implementation of general policies and procedures to provide for the physical and emotional comfort and safety of patients. Maintains competence through continuing education and in-service training.
- Sterilize equipment and supplies, using germicides, sterilizer, or autoclave.
- Performs other duties as assigned or requested.
- Attendance and being on time, ready to work your scheduled hours is an essential job requirement.
