About
Calvary Robotics is recognized as a world-class Technology and Automation Company. We are comprised of four major business units that are synergistic and complementary to one another. Our commitment to constantly improve and innovate is at our core. We believe work should be challenging and exciting providing you with a sense of both satisfaction and pride.

In this fast-paced and continuously-changing robotics and automation world, you have to think both critically and creatively. You must have the ability to work independently as well as cooperatively in teams.

It is our people that make the difference. If you’re up for the challenge and working on the leading edge of innovation excites you then we would love to meet you. Let’s talk.

Position
We currently have a NEED for a contract based temporary programmer. This position can turn into a full-time position after the contract period, if the person chooses to accept the offer. Work to begin ASAP and go through 3/13.
