Diamond Turning Machine Operator

About

Micro-LAM, Inc., a rapidly growing startup, is seeking a hard-working, knowledgeable, goal-oriented, and creative individual to fill the diamond turning machine (DTM) operator position. The ideal candidate should be self-motivated and willing to work in a dynamic environment. The selected candidate will be part of a novel laser-assisted machining technology that is utilized in modern optical shops around the world.

Key Responsibilities

- Perform large volume production of optical components using DTM
- Plan tests and set up parts on DTM
- Conduct testing of current and new products on DTM
- Perform metrology, including surface and form measurements
- Meticulously handle and visually inspect parts

Qualifications

- Experience in programming CNC machines: G & M-Code
- Experience in part setups for machining parts in CNC machines
- Experience with precision optical metrology equipment
- Familiarity with optical fabrication processes (DTM, grinding, polishing, etc.)
- Familiarity with engineering drawings (optical drawings is a plus)
- Familiarity with precision engineering principles

How to Apply

Interested individuals should send their resumes to hossein.shahinian@micro-lam.com

Note: We are an equal opportunity employer, and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, age, disability status, veteran status, marital status, citizenship status, sexual orientation, gender identity or any other characteristic protected by law.
