SCHOTT North America is hiring a full-time **Engineering Technician**

**About**

SCHOTT is a leading international technology group in the areas of specialty glass and glass-ceramics. The company has more than 130 years of outstanding development, materials, and technology expertise and offers a broad portfolio of high-quality products and intelligent solutions. SCHOTT is an innovative enabler for many industries, including the home appliance, pharmaceutical, electronics, optics, automotive, and aviation industries. SCHOTT strives to play an important part in everyone’s life and is committed to innovation and sustainable success.

**Position**

SCHOTT North America is looking for a full-time Engineering Technician that is highly motivated, flexible, and a hardworking self-starter. This position requires excellent critical thinking, decision-making, and time management skills.

**Duties and Responsibilities**

- Has basic scientific/engineering knowledge required to execute non-routine laboratory tasks related to projects and customer support with close supervision of an engineer/manager.
- Is able to conduct training on the use of all instrumentation/equipment within a specified area.
- Ability to follow procedures and to utilize supplied mathematical formulations to obtain measurements and results.
- Collects and analyzes data utilizing a variety of test equipment and instrumentation.
- Conducts non-routine tests and experiments to develop products and processes.
- Assures equipment is operating properly and is able to perform routine maintenance.
- Maintains records of all results in an orderly and established manner.
- Reports data and information to appropriate personnel within the organization to influence a variety of production, quality, sales and research decisions. These reports can be oral and/or written as specified by their supervisor.
- Responsibility for maintaining appropriate levels of supplies required for the operation of equipment within a specified area.
- Identifies improvement measures related to processes, tests and experimental procedures and makes suggestions on how to improve such activities to improve efficiency (to the Manager/Engineer).
- Modifies and/or updates procedures as required.
- Able to prepare/organize data in graphs, spreadsheets, charts.
- Support the execution of project milestones.
- Performs other duties as assigned.
- Hazardous waste activities include adding hazardous waste to accumulation containers, removing waste from accumulation containers, transporting hazardous waste to or from accumulation points, daily inspection of satellite hazardous waste accumulation areas, and cleanup of small spills of hazardous waste.

**Education/Experience/Attributes**

- Associate Degree (A.A.) in science or engineering or Bachelor Degree (B.S. or B.A.) in science or engineering.
- A.A. and 5+ years of experience or B.S./B.A. with 1-year experience preferred; CNC and/or Waterjet experience a plus.
- Basic math and computer skills (Microsoft office). SAP experience is a plus.

**How to Apply**
