The MCC Nursing Program (RN) A.A.S. for incoming high school seniors (NUE1) is offered every fall semester. Approximately ten high school students are admitted to NUE1. All applicants meeting the admission requirements by the application deadline will be considered. MCC maintains a selective and competitive admissions process for this program; see the selection criteria below. NUE1 is a three-year program. Admitted NUE1 students will be expected to complete non-clinical coursework during their first year (i.e. ENG 101, BIO 144, PSY 101). Upon successful completion of courses during the first year (as prescribed by the Nursing Department), students will be guaranteed admission into NU01 for clinical coursework and remaining requirements.

Applicants who are not selected for NUE1, do not meet the admission requirements, or who apply after the deadline date will be admitted into another program at MCC (Health Studies-Clinical Track or Liberal Arts) and will have the opportunity to work with an academic advisor to select appropriate courses for possible admission into the program for a future semester. Please refer to the Nursing admission information for “Current Students.”

**Application Deadline and Notification**

- The application deadline is January 31, 2021 for Fall of 2021. Admission notifications will be mailed by March 15, 2021.

**How to Apply**

- Complete the [MCC application](#) by January 31, 2021
- All official transcripts must be submitted by the January 31st date to be considered. This includes high school transcripts, AP or IB score reports (if applicable), and college transcripts (if applicable; i.e. dual credit coursework taken at other institutions).

**Admission Requirements**

Prerequisite courses must be completed prior to the application deadline with a “C” or better. Science courses must include a lab. All classes must be at least a one credit course; half credit courses do not meet the required prerequisite.

Selection will be based upon the grades received on the Regents exam and final course grades for the courses listed below. Regents exams are weighted heavier than local exams, but local level exams will be accepted. Please note that students who were enrolled in one of the prerequisite courses during the 2019-2020 school year and were exempt from the Regents exam will have their final course grade used in the selection process.

Students will be ranked according to the combined average of math, biology, and chemistry grades.

- High School Algebra II/Trigonometry or Algebra II (Common Core) Regents exam of 75 or higher or a final course grade of 85 with a 3.0 GPA.
- High School Living Environment/ Biology
- High School Chemistry
- US citizen or have Permanent Resident Status by the application deadline
- New York State resident residing in Genesee, Livingston, Monroe, Ontario, Orleans, or Wayne Counties

**Additional Notes Regarding Admission**

- If admitted to the program, the student’s class schedule will be assigned by the Nursing Department.
- Students must be available to take classes during the day and have reliable transportation to clinical sites during year two and three.
