Follow-Up Study of 2019 Graduates

The information in this study is based upon the 1,971 credentials (i.e., degrees and certificates) earned by graduates of the Class of 2019. We have outcome data on 1,218 (62%) of those graduates that came from the Graduate Follow-Up Survey, the National Student Clearinghouse, and various MCC departments.

❖ GRADUATES

1,971 CREDENTIALS WERE AWARDED TO GRADUATES OF THE CLASS OF 2019

- 1,228 (62%) GRADUATES HAD BEEN IN TRANSFER PROGRAMS
- 547 (28%) GRADUATES HAD BEEN IN CAREER PROGRAMS
- 196 (10%) GRADUATES HAD BEEN IN CERTIFICATE PROGRAMS

❖ TRANSFER PROGRAM GRADUATES

WE HAVE OUTCOME DATA ON 824 A.S./A.A. GRADUATES:

- 772 (94%) ARE CONTINUING THEIR EDUCATION (FULL-TIME OR PART-TIME)
- 30 (4%) ARE EMPLOYED FULL-TIME
- 22 (3%) ARE EMPLOYED PART-TIME

❖ CAREER PROGRAM GRADUATES

WE HAVE OUTCOME DATA ON 265 OF THE A.A.S. GRADUATES:

- 138 (52%) ARE EMPLOYED FULL-TIME, 128 (49%) IN THEIR MAJOR FIELD
- 53 (20%) ARE EMPLOYED PART-TIME
- 68 (26%) ARE CONTINUING THEIR EDUCATION (FULL-TIME OR PART-TIME)
- 5 (2%) ARE CURRENTLY AVAILABLE FOR EMPLOYMENT
- 1 (<1%) HAVE NOT CONTINUED THEIR EDUCATION AND ARE NOT EMPLOYED

❖ CAREER PROGRAM GRADUATES - CERTIFICATES

WE HAVE OUTCOME DATA ON 129 OF THE CERTIFICATE GRADUATES:

- 37 (28%) ARE EMPLOYED FULL-TIME, 34 (26%) IN THEIR MAJOR FIELD
- 14 (11%) ARE EMPLOYED PART-TIME
- 72 (56%) ARE CONTINUING THEIR EDUCATION (FULL-TIME OR PART-TIME)
- 5 (4%) ARE CURRENTLY AVAILABLE FOR EMPLOYMENT
- 1 (1%) HAVE NOT CONTINUED THEIR EDUCATION AND ARE NOT EMPLOYED

❖ COLLEGE TRANSFER:

- **674 (57%)** OF ALL THE GRADUATES WE HAVE OUTCOME DATA ON ARE CONTINUING THEIR EDUCATION FULL-TIME
- **990 (50%)** OF GRADUATES TRANSFERRED EITHER FULL- OR PART-TIME TO 117 DIFFERENT COLLEGES & UNIVERSITIES
- **736 (74%)** OF TRANSFERRING GRADUATES ARE ENROLLED IN LOCAL COLLEGES AND UNIVERSITIES INCLUDING:

SUNY COLLEGE AT BROCKPORT	194
ROCHESTER INSTITUTE OF TECHNOLOGY	101
ST. JOHN FISHER COLLEGE	67
SUNY COLLEGE AT GENESEO	39
NAZARETH COLLEGE.....	32
ROBERTS WESLEYAN COLLEGE	26
UNIVERSITY OF ROCHESTER	21
SUNY EMPIRE STATE COLLEGE	16

- ALL SUNY/CUNY COLLEGES COMBINED ACCOUNT FOR **624 (63%)** OF TRANSFERRING GRADUATES
- **1,207 (61%)** OF GRADUATES ARE EMPLOYED AND/OR CONTINUING THEIR EDUCATION

❖ EMPLOYMENT:

- GRADUATES WERE HIRED BY **279** EMPLOYERS.
- LOCAL EMPLOYERS CONTINUE TO HIRE THE VAST MAJORITY OF OUR GRADUATES. OF THE CAREER AND CERTIFICATE PROGRAM GRADUATES WHO INDICATED CURRENT FULL-TIME EMPLOYMENT, **93%** ARE EMPLOYED IN MONROE COUNTY OR AN ADJACENT COUNTY.
- OF THE CAREER AND CERTIFICATE PROGRAM GRADUATES WHO ARE EMPLOYED FULL-TIME, **93%** ARE IN JOBS RELATED TO THEIR MAJOR AT MONROE COMMUNITY COLLEGE .
- **232 (45%)** OF THE GRADUATES WE HAVE OUTCOME DATA ON ARE EMPLOYED FULL-TIME, AND **200 (39%)** ARE EMPLOYED PART-TIME.

• THE TYPES OF COMPANIES & ORGANIZATIONS THAT MOST FREQUENTLY EMPLOY OUR GRADUATES ARE:

HOSPITALS, HEALTH CARE FACILITIES, DENTAL OFFICES, & NURSING HOMES.....	124
HOTELS, RESTAURANTS, GROCERY STORES, SALONS, & GYMS.....	77
TELECOMMUNICATIONS, BUSINESS, COMPUTER SERVICES, LAW OFFICES, & BANKS.....	68
HVAC, MANUFACTURING, CONSTRUCTION, & AUTOMOTIVE COMPANIES.....	57
EDUCATIONAL INSTITUTIONS (SCHOOLS, COLLEGES, & UNIVERSITIES).....	34
RETAIL STORES, EXCLUDING GROCERY STORES	24
SOCIAL SERVICE AGENCIES, CHILD CARE PROVIDERS, & NON-PROFIT ORGANIZATIONS	23
CITY, COUNTY, STATE, & FEDERAL GOVERNMENT OFFICES, INCLUDING THE MILITARY.....	20

• THE LOCAL COMPANIES & ORGANIZATIONS THAT MOST FREQUENTLY HIRE OUR GRADUATES ARE:

UNIVERSITY OF ROCHESTER, INCLUDING UR MEDICINE CAMPUSES	53
MONROE COUNTY, INCLUDING MCC.....	19
ROCHESTER REGIONAL HEALTH SYSTEM	18
WEGMANS	16
CITY OF ROCHESTER, INCLUDING POLICE & FIRE DEPARTMENTS & SCHOOL DISTRICT	6

The tables shown on the following pages are organized hierarchically to avoid presenting duplicate data. That is, graduates who are counted in one category (e.g., "Number Continuing Their Education Full-Time") are not counted in the subsequent categories (e.g., "Number Employed Full-Time"). The pages facing the tables, however, show all employers and transfer colleges.

The information in the table is unduplicated. That is, graduates who are counted in one category (e.g., "Number Continuing Their Education Full-Time") are not counted in other categories (e.g., "Number Employed Full-Time").

Addictions Counseling

The addictions counseling associate degree fulfills state requirements for a Credentialed Alcohol & Substance Abuse Counselor (CASAC) license. One of the few New York community colleges to offer a degree in addictions counseling, MCC offers specialized training for this challenging field—including an internship that provides students with 300 hours of practical, supervised field experience.

Students take seven specialized courses in alcohol and chemical dependency counseling, plus additional classes in psychology, sociology, communication, statistics, and health. This program is designed to prepare students to transfer into a bachelor's degree program in social work or another relevant field.

African American Studies

This program provides excellent preparation for transfer to a four-year institution and a wide range of career paths. Students study the regional and national issues that relate to the African American experience - and advance their understanding of group identity, inclusion and exclusion, intergroup conflict, and inequalities based not only on race, but gender, ethnicity, and income. Through this unique interdisciplinary program, credits earned at MCC are transferable to a wide range of bachelor's degree programs and careers, including those in: sociology, African American studies, public policy, social work, business, human resources, law and criminal justice, and non-profit management.

The African American Studies degree program expands the students' knowledge of historical and contemporary injustices of racial oppression. A dynamic combination of coursework, field experiences and service learning is designed to sharpen students' abilities to write and think critically, and communicate effectively.

Note that this program was formerly part of the Diversity and Community Studies program. That program was subdivided into four separate programs: African American Studies, Gender and Sexuality Studies, Global Studies, and Urban Studies.

Biology

In this program, students are challenged by a dynamic combination of classroom, lab, and field work. Under the guidance of biology department professors, they conduct scientific research and gain hands-on lab experience. Along the way, they develop the critical thinking, problem-solving and communication skills necessary for academic success today, and career success tomorrow.

Business Administration

The Business Administration associate degree emphasizes business fundamentals as well as business management skills, such as strong writing, verbal communication, critical thinking, analysis, and oral presentation. Students have the option to work on collaborative projects with Rochester-area firms, gaining valuable real-world business experience.

This program is designed to be the first two years of a bachelor degree program. Students may then transfer into any business bachelor's degree program accredited by the AACSB (Association to Advance Collegiate Schools of Business). Students are prepared to major in such areas as: accounting, finance, management, marketing, human resources, management information systems, and other business related fields.

Business: International Business

With an associate degree in Business: International Business, students prepare to do business all over the world. Students take courses in accounting, business, and economics. In addition, they study foreign languages and cultures to gain an understanding of overseas markets. This program also covers worldwide economic and political issues that influence global business.

The degree satisfies the first half of most four-year degrees in international business. Students can go on to earn a bachelor's degree in business, international business, marketing, economics, and finance.

Chemistry

In the Chemistry associates degree program, students develop the lab skills and science knowledge they need to succeed at a four-year institution, as well as in their future science career. Students are challenged by a dynamic combination of classroom and laboratory work. They develop the critical thinking, problem-solving and communication skills necessary for academic success today and career success tomorrow.

Cinema & Screen Studies

MCC is the first New York state community college to offer a two-year Cinema & Screen Studies degree. In this unique program, students explore the history and artistry of moving images, while learning about the business aspects of video and film.

The program gives students the opportunity to write original scripts and learn introductory production techniques. It introduces cinema as a medium of mass communication that combines two art forms (photography and theater) to convey powerful stories with vivid pictures and strong emotion. Students critique films from many different cultures and genres, developing strong writing, research, and analytical skills.

MCC's associate degree in Cinema & Screen Studies is the first step toward a four-year degree in film or mass media. This program satisfies the first half of most four-year programs.

Communication & Media Studies

In the Communication & Media Studies associate degree program, students complete the first half of a bachelor's degree in many communication and media fields. The program emphasizes writing, speaking, and the presentation of visual information while providing an excellent foundation in the liberal arts. Students have the opportunity for internships at TV and radio stations, newspapers, advertising firms, and video and film production companies. Through laboratory and studio experiences, students may build a personal media portfolio by creating publications, developing visual and broadcast information formats, and becoming familiar with the equipment used by communications specialists.

Computer Information Systems

Computer information systems professionals are in high demand in almost every industry. Students take computer information systems courses recommended by a national task force of computer professionals, developing a basic understanding of computer skills and strategies. In addition, they get an introduction to core business disciplines such as accounting, marketing, economics and management. Students build communication, interpersonal, analytical and problem-solving skills that are always in demand.

The Computer Information Systems program is designed to fulfill the first two years' worth of academic requirements for a bachelor's degree in management/computer information systems or a related field.

Computer Science

The Computer Science associate degree includes both the study of underlying theories as well as the specific applications of information manipulation and problem-solving. Students develop sharp analytical and creative skills, using up-to-date computer technology in the classroom and lab. The program provides a balance of computer science, mathematics, and science courses with sufficient flexibility to accommodate a range of student career interests and the various emphasis and requirements of upper division programs.

The program provides the first two years of instruction for students who plan to transfer to bachelor's programs at four-year colleges.

Criminal Justice

Designed with the help of a professional advisory board, MCC's Criminal Justice program incorporates some of the training provided to newly hired criminal justice employees. Courses focus on criminal and constitutional law, forensic science, corrections, investigation, crime scene management, and juvenile justice. The program includes an internship component, enabling students to get workplace experience under the supervision of a public agency or private firm in the criminal justice field. Students receive a first-rate criminal justice degree that enables them to move directly into the work force or transfer to a four-year college and pursue a bachelor's degree in criminal justice.

Engineering Science

The Engineering Science associate degree program is designed for students planning a career in the engineering professions who intend to transfer to a four-year bachelor's program in engineering. With a national reputation for excellence, the program is broadly based so as to fully prepare graduates, upon transfer, to specialize in any of the various fields of engineering, such as mechanical, electrical, aerospace, chemical, and biomedical. Students develop practical skills and a personal portfolio of design/build projects.

Fine Arts

The Fine Arts associate degree transfer program provides an excellent foundation for career happiness and continued studies in fine or commercial art. Students study with professors who are accomplished artists themselves. The enriching environment provides opportunities for students to travel to major museums, exhibit their own work, and participate in student art clubs and service learning projects.

Students become proficient in studio art procedures, and strengthen their skills in these essentials:

Observational and expressive drawing
Color theory

Sculpture
Painting

Design
Assemblage

In addition, a strong liberal arts curriculum prepares students for advanced coursework in art programs at four-year colleges and universities that, in turn, may offer entry into a variety of art-related professions.

The information in the table is unduplicated. That is, graduates who are counted in one category (e.g., "Number Continuing Their Education Full-Time") are not counted in other categories (e.g., "Number Employed Full-Time").

Geography

Geography is so much more than studying maps and borders. It's about our Earth's incredibly diverse physical environments and how they influence our cultures, weather patterns, economies, traditions, and day-to-day lives. Geography studies offer a unique world view and a way to be more environmentally and socially informed. This field encompasses many disciplines that can lead to a wide range of undergraduate majors and careers.

Through a dynamic combination of classroom and field experiences, MCC's geography associate degree program sharpens computer, research, and analytical skills. Students' first year includes four core geography courses that put students on a SUNY Seamless Transfer Path for their bachelor's degree. By their second year, they focus on their specific area of interest through one of four concentrations: physical geography, geospatial technology, human geography, and regional geography.

The A.S. degree puts graduates on a career path in business, scientific research and exploration, recreation, and humanities.

Geology

This degree is one of the few programs of its kind in the nation. It offers complete preparation for transfer to a four-year program in the geosciences. The career possibilities are far-ranging, too. Geologists work in fields all over the world: environmental protection, energy study, resource management, and more. The American Geological Institute predicts that within the next 10 years, there will be 150,000 geology-related jobs that will be unable to be filled by college graduates, given current graduation rates. MCC prepares students for transfer to geology-related programs.

Global Studies

This degree program provides excellent preparation for transfer to a wide range of bachelor's degree studies. Students advance their understanding of group identity, inclusion and exclusion, intergroup conflict, and inequalities based on government, economy, religion, race, gender, ethnicity, and income. The credits they earn through this unique interdisciplinary program are transferable to bachelor's degree programs and careers in:

Multinational law
International politics

Non-profit aid organizations
Multinational business

Global healthcare
Post-secondary education

Through a dynamic combination of traditional coursework, field experiences and service learning, students examine the global interdependence of diverse peoples, cultures, governments, and institutions. They sharpen their ability to think and write critically, and communicate effectively. This is excellent preparation for continued studies in a four-year college or university and future success in careers such as:

Human resources manager
Multinational business professional

Legal advocates, including paralegal and attorney
Educator and school counselor

Health Studies

The Health Studies associate degree offers a great foundation for various health-related careers. Students get a broad, practical education in multiple domains of health, enabling them to explore different career paths in the field of health. Students build high-quality credits that can be applied toward health-related bachelor's degrees.

The program offers different track options with coursework that is tailored to interest and career goals:

- Clinical (Healthcare Careers)
- Community Health
- Healthcare Administration

Program includes courses in liberal arts, biology, psychology, social science, humanities and mathematics. The core program requirements include introductory health courses such as foundations in personal health and wellness, and other health courses tailored to the needs of the career path chosen.

Graduates from our health studies associate degree program have an outstanding record of continued education and career success.

Human Services

The Human Services associate degree program emphasizes hands-on experience by working with community organizations and clients to develop career-building knowledge and skills. In just two years students have a strong foundation of experience and coursework, numerous options to transfer to four-year programs, and a great start toward a human services career.

Students explore the helping professions in the classroom and gain practical experience through internships at area agencies. Human services and social work professionals serve clients at a wide variety of organizations including child protection agencies, family counseling centers, hospitals, school, and probation departments.

The program parallels the first two years of a bachelor's degree program and prepares students to transfer to a four-year institution in social work, human services, or a related area of study.

Individual Studies

This program is designed to provide a flexible alternative for students who have defined their academic and career goals and wish to optimize transfer. Each student enrolled in Individual Studies works with an advisor to identify and follow an articulated program, taking courses which may allow them to transfer into their chosen bachelors program as seamlessly as possible. Students admitted to this program must adhere to articulated transfer programs under CAPP or through a formal articulation agreement with a four-year institution.

Information Technology

Information technology professionals store, protect, process, transmit, and retrieve an organization's most critical asset - information. The curriculum is based on the latest industry-recognized certifications and instructors combine classroom learning with extensive hands-on projects. Graduates are ready to transfer to a bachelor's degree program.

This program provides a solid foundation in information technology with the right balance of classroom and hands-on learning experiences in networking, programming, database design, and web site design. This degree program also provides the strong math background required to develop advanced problem solving skills.

Liberal Arts & Sciences - General Studies

The associate degree in General Studies provides students with a flexible, affordable pathway to a bachelor's degree in many different programs. Students are able to keep academic options open while satisfying basic liberal arts bachelor's degree requirements. Liberal Arts degrees develop skills that employers place a high value on. These include:

Critical, analytical, and creative thinking
 Quantitative reasoning
 Teamwork and problem solving
 Civic knowledge and engagement – local and global

Strong written and oral communication
 Information literacy
 Ethical reasoning and action

Graduates are ready to move on to a four-year school to complete their bachelor's degree.

Liberal Arts & Sciences - Science

The Liberal Arts & Sciences associate degree in Science provides students with a flexible, affordable pathway to a science-related bachelor's degree. Graduates have the opportunity to transfer into a top-rated science degree program at a four-year school.

This program allows students to explore multiple scientific disciplines while getting hands-on lab experience and conducting scientific field research. Students are provided with the opportunity to develop critical thinking, problem solving, and communication skills.

Students can sample a diverse range of science courses and choose from many academic tracks, with options that include:

Biology
Geosciences
Pre-pharmacy

Chemistry
Physics
Pre-chiropractic

Environmental science
Pre-forestry

A two-year science degree allows students to pursue career opportunities in some of the world's most dynamic industries, including:

Mathematics

An associate degree in Mathematics can be the first half of an equation that adds up to a mathematics bachelor's degree. This program is designed to prepare students to gain admission to a four-year mathematics degree program to prepare them for careers as mathematics teachers, industrial mathematicians, computer scientists, and professional actuaries.

In this program, students take math courses that are generally equivalent to the first two years of a math bachelor's degree. Upon completing the Mathematics associate degree, graduates are ready to transfer directly to a four-year college with junior status, majoring in mathematics, applied mathematics, mathematics education, statistics, or a related field.

Music Performance

The Music Performance associate degree program offers an excellent academic, studio and performance experience that combine to build a solid foundation for transfer to a four-year program. The curriculum includes a balance of courses to help students gain musical knowledge and develop a particular music skill. The outstanding music lab gives students room to grow creatively and fully develop their talent. There are many opportunities to perform in public at student organizations and ensembles.

Graduates are well prepared to transfer, earn a baccalaureate degree in music and thrive in a music career. Music Performance graduates have gone on to rewarding careers as performance artists, composers, music teachers, music therapists, and studio musicians.

Psychology

It's not surprising that psychology is one of the top three majors at the undergraduate level. It offers a wide variety of career paths, especially for students planning on graduate school. Psychologists play key roles in government and industry. Some teach and conduct research at colleges and universities. Some offer therapy or counseling. Some work in the educational system. Psychologists also work in sports, marketing, management, and more.

Students at MCC who earn an A.S. degree in psychology are ready to move on to a four-year school to complete their bachelor's degree. After that, they may opt to enter the workforce or continue on in graduate school.

If they plan to transfer to a SUNY four-year college or university, graduates will have met the requirements for junior standing in a psychology major. Their studies at MCC include developmental, social, and abnormal psychology, plus research methodology. Additional courses in humanities, writing, natural sciences, and statistics can also sharpen critical thinking and communication skills.

Public Relations

The Public Relations program is designed to prepare students for transfer to a four-year college or university that offers programs in public relations, communications, and mass media. The curriculum provides a foundation in liberal arts and a background in communication theory, media writing, and public relations. The program will enable students to better understand the role of public relations today in business, government, education and non-profit organizations.

Sports Management

The associate degree program in Sport Management covers the first two years of a bachelor's degree in sport management, sport science or a related field.

Students take specialized sport management courses such as fitness, sport science, health and wellness, and outdoor education and get workplace experience in sport management via internships with Rochester's top pro sport organizations. In addition, the sport management program introduces business fundamentals such as accounting, marketing, and human resources.

The sport management associate degree helps students build toward a career in fields such as:

Sport business and marketing
Major and minor league sport operations
Sport promotion

Athletic administration
Facility and event management
Equipment development and retail

Sustainability Studies

Sustainable practices are not only good for the earth, they're good for careers in business, health care, fashion, journalism, hospitality, technology, law, and tourism—to name just a few! In the Sustainability Studies associate degree program, students gain a deep and broad understanding of the issues, topics and disciplines that surround sustainability.

Sustainability is grounded on the conviction that we should develop ways to meet our present needs without compromising the ability of future generations to meet their own needs. The sustainability studies A.S. program provides students with an understanding of how social, economic, institutional, and environmental aspects of sustainability relate to both the human and the non-human environment.

Students study the interrelated trends of population growth, resource consumption and technological progress. They also analyze how individual actions affect social, economic, and environmental systems, and design a solution to a sustainability-related problem.

Theatre Arts

With a Theatre Arts associate degree, students are halfway toward a bachelor's degree in theatre. Students may choose an optional concentration in either theatre performance or technical theatre. Whichever theatre concentration is followed, students help to produce several shows each year for the MCC Theatre. They get hands-on experience both onstage and backstage in a wide range of theatrical genres, including musicals, comedies, dramas, and children's theatre.

The program covers a complete range of theatre fundamentals. Through a combination of courses, workshops, and labs, students develop theatre skills in acting, directing, lighting, music and sound, set design, costumes, makeup, and props. Graduates of the theatre arts program have a strong record of continued education and career success, building successful theatre careers both onstage and off.

Wellness Coaching

This degree prepares students for a field with a robust 13% annual growth rate!* Professionals in health and wellness coaching often work as part of a team that includes other health care professionals and fitness experts. Together, they focus on helping clients increase day-to-day productivity and vitality, prevent disease, and reach their individual fitness goals. Graduates of the program can find rewarding work educating and guiding others in clinics, corporations, and fitness clubs.

Through classroom, lab and field experiences, students study the many physical and emotional aspects of health and wellness. They strengthen communication skills essential to this client-centered field. And they leave ready for entry-level positions (such as Fitness Instructor) or further study leading to a wide variety of job titles in public health or private practice.

Creative Writing

At MCC, students learn from professors who are published writers themselves. They meet other aspiring student writers and share their work in a mutually supportive environment. Their MCC studies culminate with learning about submitting their own work and publishing opportunities in Rochester and throughout the country.

Through classroom experiences, students sharpen their writing skills while exploring a variety of writing disciplines and career pathways. They also take foundation courses that lead to successful transfer to a bachelor's degree in English, Creative Writing, and more—at outstanding four-year colleges.

This program offers an exciting opportunity to make writing part of one's life. There is also a variety of professional fields that involve creative writing, including:

Journalism
Publishing
Marketing

Education
Advertising
Television

Web Content Writer
Grant Writing

Liberal Arts & Sciences - Adolescence Education

The Adolescence Education associate degree program stands out because it offers:

- Real teaching experience. Students get hands-on teaching experience in our partner districts throughout Monroe County.
- Transfer opportunities. The adolescence education associate degree program has transfer partnerships with many four-year institutions, so students can build their adolescence education two-year degree into a bachelor's degree. MCC uses the SUNY Teacher Education Transfer Template (TETT), specifically designed to promote transfer to SUNY campuses.
- Career preparation. The adolescence education associate degree is the first step toward New York State teacher certification.

Intended for students who want to teach in grade levels 7 through 12, the degree program is built around practical experience. Students work with seasoned teachers in actual classrooms and acquire a broad range of professional skills.

Graduates enjoy a high rate of success on teacher certification exams, and an excellent record of job placement.

Accounting: General

The Accounting: General program offers fast, professional workplace preparation, with emphasis on job skills that hiring managers seek – including the ability to use up-to-date accounting software programs.

The program is career-oriented. Students study general accounting procedures, automated accounting systems, and spreadsheet programs. They learn about record keeping, payroll procedures, money management, and business law.

After only two years, graduates are ready to enter the job market in fields such as accounting technician, assistant bookkeeper, head bookkeeper, auditing clerk, payroll bookkeeper, or accounts payable/receivable clerk.

With an associate degree in accounting, students have the background and skills to compete for good jobs in organizations of every size and type.

Air Conditioning Technology: Heating & Ventilation

Technology for climate control and energy efficiency is advancing rapidly – and so are career opportunities in the HVAC industry. The Air Conditioning Technology: Heating and Ventilation associate degree program, gives students practical training in all aspects of heating, ventilation, and air conditioning. Students build in-demand skills to get started in the workforce – or spark professional growth if they already work in the HVAC industry. The career-oriented Air Conditioning Technology program provides quick, affordable preparation for jobs in areas such as refrigeration mechanic and installer, home appliance repairer, service technician, systems detailer/designer, construction and building inspector, and facilities maintenance technician.

The program emphasizes practical application of HVAC systems, including solar and other green technologies. Students work side-by-side with experts in the field, in state-of-the-art labs designed by Siemens Energy Management.

Courses include motors, electronics, pumps, ventilation, and refrigeration, along with applied mathematics and science. Students also develop core skills in plumbing, electrical, and carpentry. The program has benefits for students who are just entering the workforce, as well as current HVAC pros who seek to increase their skills and potential earning power.

** This data comes from SUNY and shows post-graduation wages in any field regardless of full- or part-time employment. The data shown in the 2019 column is for 2016-17 graduates and their 2017-18 earnings. The other years follow suit. Data is not available if fewer than 10 graduates per program found employment.

The information in the table is unduplicated. That is, graduates who are counted in one category (e.g., "Number Continuing Their Education Full-Time") are not counted in other categories (e.g., "Number Employed Full-Time").

Applied Integrated Technology

This unique, interdisciplinary curriculum teaches students how to combine the principles of science, engineering, and mathematics to solve technical problems. They have extensive hands-on experiences and participate in team projects that simulate industry scenarios.

The applied integrated technology A.A.S. program at MCC teaches students how today's manufacturing combines electronics, mechanical systems, and computers in ingenious new ways. Students become state-of-the-art technicians for installing, operating, and maintaining these integrated industrial processes, also known as mechatronics. Upon completion, they are ready to pursue a career as an engineering technician, earning a high starting salary.

Apprentice Training: Automotive

Auto technology is more sophisticated than ever – and so are automotive technicians. In the Automotive Training Apprenticeship associate degree program, students develop advanced knowledge and skills that qualify them for the best jobs in the industry. Students get hands-on training in an automotive job, and then take evening classes that deepen their understanding of auto design and technology. This one-of-a-kind associate degree program, available only at MCC, gives students the smarts, work connections, and experience they need for a long-lasting career in auto care.

The program offers big rewards, and requires a major commitment – over three years, students hold down an automotive job and take classes at MCC in the evening. Courses at MCC's Applied Technologies Center cover all major automotive systems, including:

Computer technology
Steering & suspension

Electrical components
Heating & air conditioning

Emissions controls

Students also learn about the consumer trends and legislative initiatives that drive today's automobile industry – and are helping to shape its future. Demand for qualified auto service technicians is growing in the area. At work and in the classroom, students explore many facets of auto service technology and discover their niche. Students may start out with job titles such as, automotive specialty technician, maintenance and repair worker, or tire repairer & changer.

Biotechnology

Small things can lead to big career opportunities with a Biotechnology associate degree. Students with an interest in chemistry and molecular biology – the study of life in its smallest, most fundamental form – may pursue a rewarding career in health care, pharmaceuticals, environmental testing, food processing, or university research. Students may also choose to study for a bachelor's degree in a related field at prestigious 4 year schools.

The coursework focuses on essential molecular biology concepts, techniques, and instrumentation. Through classes and labs students develop an understanding of the interaction between the various systems of a cell and operate laboratory equipment commonly used in a research setting. Graduates are qualified to pursue a career in a wide range of organizations engaged in molecular biology and research.

Child Care Practitioner

This program was developed for individuals who work with or plan to work with infants, toddlers, preschoolers, and early school age children up to age 8. Focus areas are on writing and implementing curriculum and lesson planning, early literacy in addition to properly observing and assessing young children.

Students who complete this degree are prepared to enter the early care work environment, including infant, toddler, preschool and pre-kindergarten settings. Other opportunities include Program Coordinators as well as positions which require an understanding of child development and effective learning environments for young children.

Clinical Laboratory Technician

Monroe Community College offers the only Clinical Laboratory Technician associate degree program in the Rochester area. This two-year degree program, housed in the biology department, offers outstanding career training in lab tech skills and technologies. Students get a practical, hands-on education in medical laboratory procedures, while gaining valuable field experience in various clinical lab settings.

The program enables students to:

- Develop clinical lab tech skills
- Pass professional licensing exams
- Add work experience and references to their resume
- Compete for medical lab technician and clinical lab technician jobs

It provides students with a practical education in medical laboratory procedures. Students have coursework in math, data recording, laboratory analysis, medical computer applications, and written/oral communication. In addition, the Clinical Lab Technician associate degree covers medical subjects such as, hematology, microbiology, immunology, serology, clinical chemistry, and urinalysis.

While earning an associate degree, students train to be a clinical laboratory technician in many types of laboratory settings, including hospitals, reference testing labs, and nonprofit organizations such as the Red Cross.

The program is very competitive and most students have completed several required courses before beginning the four-semester sequence of Clinical Laboratory Technician courses.

Computer Information Systems

The Computer Information Systems (CIS) A.A.S. program puts students at the intersection of business and technology. Students build skills that are coveted by every employer, developing the ability to make computer systems – and the employees who use them – smarter and more productive. Students learn to program, develop websites, build databases, and streamline communications networks. This field has high growth potential and relies on skills that can't be easily outsourced. Graduates find opportunities in a wide range of organizations, including medicine, national defense, business, news media, and education.

The program emphasizes the skills students need for employment in customer service and technical support. Core courses provide students with a solid base of communication, interpersonal, analytical and problem-solving skills, along with a basic understanding of programming, networks, and databases. Students also learn business fundamentals such as, accounting, marketing, economics, and management.

This career associate degree includes an internship component, where students gain valuable work experience while earning college credit. Graduates are ready for many entry-level positions, including telecommunications equipment installer and repairer, demonstrator and product promoter, computer user support specialist, computer technician, computer network architect, or help desk analyst.

Computer Systems Technology

From computer installation and repair to network planning, the Computer Systems Technology associate degree gives students the flexibility to pursue a career that fits their interests. Students work in state-of-the-art learning facilities, including our robotics lab, and develop skills in cybersecurity and Python. Students are prepared to build critical thinking and problem solving skills in real-life class projects with their peers.

The program provides students with comprehensive computer systems knowledge used in today's networked environments. The coursework includes training with the latest networking components and tools from industry leaders such as Cisco Systems. Students become creative problem solvers and develop skills in essential areas, including electronics, digital logic, programming, computer architecture, and operating systems.

Construction Technology

In the Construction Technology associate degree program, students get first-rate career training for the construction industry. It offers a practical introduction to all aspects of construction management, including hands-on experience with the most current construction technology.

The degree covers every aspect of the construction industry. Students learn about construction technology and materials for buildings, highways, and heavy construction. Courses cover a wide range of technical subjects, including construction surveying, CAD graphics, concrete and soils, statics, and materials strength and properties.

In addition, students develop skills that prepare them for supervisory and managerial roles, with courses in construction management, project management, estimating, and contracts. The program has a strong reputation among employers and graduates do well once they reach the job market. Students may also choose to continue their education in a bachelor's degree program, transferring their credits to top four year schools.

Criminal Justice: Institutional Corrections

The Criminal Justice: Institutional Corrections A.A.S. program was created under the guidance of a county-wide advisory board and maintains MCC's high standard of education and training in the criminal justice field. In addition to learning current practices in corrections administration, students receive a well-rounded liberal arts curriculum that fosters strong communication skills and understanding of criminology and human behavior. This associate degree program provides a significant advantage when it comes to advancing to a supervisory position.

The corrections administration option of the Criminal Justice program emphasizes correctional theory, law and procedure, as well as applied social and behavioral science. Students take such subjects as:

Criminology

Community-based corrections

Behavior modification

Legal aspects of corrections

Institution procedures

In addition to coursework, students apply what they learn through an internship, enabling them to get workplace experience under the supervision of professionals in the criminal justice field. Graduates may start out as a corrections officer, jailer, or first-line supervisor of correctional officers, working at federal, state, and county correctional facilities and national security detention centers. All positions require that graduates meet standard physical and moral standards, while some positions require passing a civil service exam for employment.

Criminal Justice: Police

This program was developed in collaboration with a county-wide advisory board, helping to ensure the most relevant and effective curriculum for a successful career as a police officer or other law enforcement agent. It offers the high level of professional training required for a challenging and rewarding field.

Students study the structure and functions of all things related to criminal justice, including the principles of law and justice, the structure of the courts, the importance of community involvement, and the role of corrections. Students apply what they learn through an internship, enabling them to get workplace experience under the supervision of a public agency or private firm in the criminal justice field.

In addition to police officer, the program lays a strong foundation for a wide range of front-line law enforcement positions, including:

Asset protection officer	State trooper
Sheriff or deputy sheriff	Patrol officer
Campus safety officer

The information in the table is unduplicated. That is, graduates who are counted in one category (e.g., "Number Continuing Their Education Full-Time") are not counted in other categories (e.g., "Number Employed Full-Time").

Dental Hygiene

This nationally accredited associate degree in Dental Hygiene prepares students for a rewarding career in one of America's fastest growing healthcare professions. Dental hygienists enjoy excellent employability, flexibility, and earnings. Students are prepared to work in private practice, clinics, and hospitals. The Dental Hygiene program is hands-on: students practice their skills with real patients in our modern dental hygiene clinic and in the community.

This is a professional career program that includes courses in liberal arts and basic dental science, plus clinical experience. Students also learn about the profession on clinical assignments in the community.

Upon completion of the program, students are eligible to take the national licensing exam required to practice dental hygiene. Graduates consistently receive high pass rates on board certifications and go on to rewarding careers at dental health facilities such as private dental practices – adult and pediatric, non-profit & community clinics, and hospitals.

The Dental Hygiene program is accredited by the Commission on Dental Accreditation of the American Dental Association.

Electrical Engineering Technology: Electronics

In the Electrical Engineering Technology associate degree program, students get hands-on training for a career in electronics design, manufacturing, sales, or service. In recognition of the program's excellence, the Electrical Technology degree has been accredited by ETAC/ABET – the same organization that accredits electrical engineering programs at four-year schools. Students spend many hours in the electronics lab getting practical experience with industrial-grade equipment.

In the program, students work with all types of electrical technology, including:

Computers
Touchscreens

Manufacturing & construction instrumentation
Smartphones

Audiovisual systems
Industrial hardware

Students get a broad background that prepares them for a wide range of careers in electrical technology, while taking courses in circuit analysis, computer applications, digital electronics, microprocessors, applied physics, and technical writing.

After completing this two-year degree, students are well prepared to transfer to a four-year school for a bachelor's degree in electrical engineering. Or they can go straight into the work force, with strong credentials for entry-level positions in electronics. Graduates have a strong track record of job placement and career success.

Entrepreneurial & Applied Business Studies

The Entrepreneurial and Applied Business Studies A.A.S. degree helps students launch their big ideas with the business discipline it takes to succeed. Through a curriculum based on advice from community entrepreneurs, students learn to use sound accounting practices, devise a reasonable business plan, and develop skills that make them both an effective leader and a valuable team player. Whether they plan to start their own venture, expand their current business, or join a family company, students graduate ready to make their mark on the world of commerce.

The program helps students develop a solid base of business, personal, analytical, and problem solving skills. Coursework encompasses accounting, law, marketing, management, and customer service.

Students study effective marketing strategies, and how to communicate within their organization. In the process, they learn to apply critical thinking to develop business strategies that grow their business. Studies also includes discussions about business ethics and social issues.

Entrepreneurial and Applied Business studies graduates have gone on to create successful companies that provide a wide variety of products and professional services. Graduates could

- Start a new business selling goods or professional services
- Expand or diversify a current business
- Join or lead a family business,
- Start a venture capital group within an established organization

Fire Protection Technology

The Fire Protection Technology associate degree program provides the top-tier training students need to become firefighters. The program is one of only 10 such associate degree programs in New York State and prepares students for both municipal and industrial positions.

Students learn firefighting history, the science of fire, how different types of building construction affect the spread and suppression of fire, and how to perform basic fire inspections and outline steps to increase safety. They also gain valuable field experience. Working alongside experienced professionals, students apply the latest firefighting methods and technologies to real-life fire scenarios.

Health Information Technology/Medical Records

The Health Information Technology A.A.S. program prepares students to excel in this interesting and challenging field. Students study:

- Ways that health information technologists help health care professionals and administrators make good decisions
- How to maintain documentation compliance required by law and insurers
- Principles of confidentiality and security in today's e-health environment

In addition, students take essential health care courses such as human anatomy, physiology, medical terminology and clinical coding.

Graduates are eligible to take the certification exam to become a Registered Health Information Technician (RHIT), opening the door to many organizations that value health information professionals, including hospitals, health clinics, long term care facilities, government agencies, insurance companies, and financial auditing firms. Graduates are also qualified to pursue advanced health information degrees through the Ph.D. level.

Hospitality Management

The A.A.S. degree in Hospitality Management provides students with practical, hands-on preparation for careers in the hospitality industry. Students build the skills they need for immediate employment in food and beverage, travel and tourism, golf management, or event planning. Or, students can transfer their MCC credits into a hospitality management bachelor's degree program. Either way, students enjoy unique opportunities to gain direct experience in hospitality management, with the chance to:

- Work in our student-operated restaurant, a fine-dining venue featuring from-scratch menu items and international cuisines
- Enroll in our Disney World internship program
- Study abroad in places such as Italy and the Bahamas, or on luxury cruise ships
- Join clubs that connect them to hospitality industry professionals

Students take core business courses in accounting, human resources, and customer relations, while specializing in the hospitality management program track of their choosing. Options include culinary arts & food service administration, hotel management, travel and tourism, event planning, and golf management.

The program has transfer agreements with several NY colleges. After earning a hospitality management associate degree, students can transfer directly to any of these schools to complete their bachelor's degree.

Graduates have an outstanding job placement record in restaurants, hotels, country clubs, travel and tourism, food and beverage, and related sectors.

Human Services

In the Human Services A.A.S. program, students have exciting opportunities to gain field experience through a wide variety of community organizations.

Graduates are prepared to begin their career and specialize in any number of human services paraprofessional careers. The program prepares students for paraprofessional employment in agencies, schools and centers. It provides a unique combination of college course work and human services field experience valued by employers. They are ready to assist professionals in all kinds of organizations where people help people. These include:

Community and social welfare agencies
Community organizations
Day care centers and nursery schools
Geriatric service centers

Mental health and social service agencies
Habilitation and rehabilitation agencies
Elementary and secondary schools

Students may choose courses that are most appropriate to their interests and career goals. Graduates may also wish to transfer to a four-year program, or study further at MCC, in the Addictions Counselling or Direct Disabilities Support Services certificate program.

Interior Design

The Interior Design career program offers a solid foundation in the skills and knowledge students need to design creative and functional interiors for commercial and residential clients. This two-year associate degree program offers:

- Rigorous classroom and studio environments
- A dedicated interior design resource library
- Opportunities to work on real-world projects

Students learn how to collaborate with architects, engineers, business owners, and home builders, so when they graduate, they are ready to excel in the profession. Graduates also have the option to continue their studies in an interior design bachelor's degree program.

The program combines study of the creative process with the practical requirements of materials, space planning, and building codes. The program emphasizes how to use a variety of tools, including drawings and computer processes, to communicate solutions to design problems. Students work on projects that address both residential and commercial needs so they graduate with a broad understanding of the field of interior design. Students also develop their creative vision while strengthening the business and organizational skills they need to succeed in the field. Graduates go on to fields such as, interior designer, commercial and industrial designer, home furnishings consultant, materials sales representative, and in-store design associate.

Some students choose to continue their studies in a bachelor's program before joining the workforce.

Mechanical Technology

The Mechanical Technology associate degree program offers an excellent, hands-on introduction to mechanical design. Students have the chance to showcase their mechanical design skills as a member of MCC's student robotics team, which consistently places in the top three in national competitions. The Mechanical Technology program offers practical, hands-on job training. Students build marketable knowledge and skills that employers look for in new employees, including drafting, mechanical design, computer-aided design (CAD), electronics, and manufacturing.

The degree provides students with an introduction to the principles, materials, and equipment of mechanical technology. Students take courses in manufacturing, physics, materials, electronics, thermal dynamics, and related subjects.

Graduates have strong credentials for entry-level positions in mechanical design, with potential for advancement.

Nursing

Students from the Nursing A.A.S. degree program have a 91% pass rate on the national licensing exam (NCLEX-RN). Their rates of employment, student satisfaction and employer satisfaction are even higher – 93% and up.

The program prepares students to enter the job market with confidence, hands-on clinical training, and the skills needed for immediate workplace success. MCC Nursing credits easily transfer to RN and BSN programs. It is accredited by the New York State Department of Education, the New York State Board of Regents, and the Accreditation Commission for Education in Nursing (ACEN).

The A.A.S. in Nursing degree prepares students to enter the nursing profession as a Registered Professional Nurse. Due to the competitive nature of the nursing program, most students complete several required courses before beginning the four-semester sequence of clinical nursing courses. As students complete the professional Nursing, they become part of a diverse student population while gaining clinical experience at Rochester area hospitals and health care facilities.

According to the Bureau of Labor Statistics, nursing is among the top 10 occupations with the largest job growth. After earning a Nursing degree and Registered Professional Nurse certification, graduates could advance their career in jobs such as, nurse supervisor, nurse practitioner, RN resource specialist, and medical surgical RN.

Office Technology: Office Administrative Assistant

Talented office personnel are always in high demand. With an Office Administrative Assistant A.A.S. degree, students have a well-rounded skill set that makes a strong impression in the job market. Students become proficient in state-of-the-art office technology such as advanced accounting software and multimedia tools, while developing strong written and verbal communication skills.

The Office Technology: Office Administrative Assistant associate degree program prepares students to enter the job market in just two years. This program, part of the Information and Computer Technologies department, places heavy emphasis on computer skills while developing strong interpersonal communication, an essential facet of earning promotion to supervisory and managerial positions.

Optical Systems Technology

The Optical System Technology associate degree provides students with a direct path to employment in the exciting high-tech optics industry. This unique opportunity is offered in collaboration with the Corning Incorporated Foundation, which supports the best science, technology, engineering and math (STEM) education programs. The Optical Systems associate degree provides students with the advanced training they need to move directly into the work force as an optical systems technician. Students train on the same state-of-the-art optical systems that are used in the optics industry, gaining practical, hands-on experience that employers demand. Our optical systems technology degree provides students with opportunities to:

- Evaluate optical systems
- Take standard measurements and assess electro-optic configurations
- Perform advanced optical manufacturing techniques
- Conduct advanced testing on optical systems

Optical systems technicians work with scientists and engineers to produce optical components and systems production. Students have the opportunity to get involved in every phase of the production process, including research and development, design, testing, manufacturing, quality control, sales, and service.

This one-of-a-kind program provides students with superior workforce training, helping them to lay the foundation for a strong career with a great income. It is not intended for students who wish to pursue a bachelor's degree.

Paramedic

Through the Paramedic associate degree program, students gain the skills and knowledge to provide the highest level of emergency medical services. Students learn to:

- Perform comprehensive patient assessments
- Deliver life-saving interventions
- Manage patient care while providing safe transportation to medical facilities

This program also emphasizes effective communication in stressful situations, including how to talk with family, friends, and other first responders. Students study a well-rounded curriculum that includes humanities, communications, and all courses required for paramedic certification.

The degree is for students preparing for a career at the highest level of emergency medical services. This is a hands-on program for a hands-on profession. In addition to class work, students log hospital and clinical hours, and participate in field internships. Graduates could start their career at a private ambulance company or community ambulance service.

To be accepted into the Paramedic A.A.S. program, students must have a current New York State Emergency Medical Technician Certification – available through MCC's Emergency Medical Services certificate program. This program is fully accredited by the Commission on Accreditation of Allied Health Professions and authorized by the New York State Department of Health.

Precision Machining

In the Precision Machining A.A.S. program, students get first-hand experience in the most current machining techniques and technology. Students work in one of the best-equipped college machining programs in New York State while learning from journeyman machinists with years of professional experience. The precision machining associate degree program prepares students for immediate employment in career such as, mold making, tool making, die making, machine building, and CNC machining. Alternatively, students may continue studying toward a bachelor's degree and take advantage of MCC's unique transfer agreement with SUNY IT at Utica.

The program equips students to work in the precision metal working industry. About 90% of students work part-time while studying. Students master the hands-on skills that employers demand, learning the advanced manufacturing techniques that makes valuable employees and better candidates for promotion.

Public Safety Communications

The Public Safety Communication program is designed to provide educational and professional development to those currently employed in the emergency communications field. The program focuses on communication skills development in a public safety communications center. Topics such as operations, record keeping, equipment, and dealing with diverse populations are just a sampling of areas covered in this program. Students also concentrate on specific roles, techniques, and responsibilities that each specific discipline entails (EMS, Fire, and Police). This program has two tracks – Law Enforcement Dispatcher and Fire/EMS Dispatcher. Students that successfully complete the program are certified by the Association of Public Safety Communications Officers Institute (APSCO).

At the completion of the program, students can:

- Receive 911 phone calls and obtain information from the caller pertinent to emergency and non-emergency situations necessary to identify the appropriate resources required.
- Effectively communicate with 911 callers who may be distressed, disabled, impaired, or from dissimilar cultures.
- Record incident information in a consistent, accurate, and easily understood fashion.
- Identify the specific resources required for an incident and accurately dispatch them in a timely fashion.
- Obtain critical information via telephone, computer, radio, reference sources, and electronic media used in public safety.
- Provide basic emergency medical instructions via phone to callers with medical and trauma emergencies.

Radiologic Technology

The Radiologic Technology associate degree combines classroom instruction with hands-on experience in many imaging procedures, including radiography, mammography, and CT scanning. Students work in clinical settings with the most advanced technology, and develop skills that translate directly to the workplace.

In the program, students attend lectures and labs on campus and take clinical classes at Rochester-area hospitals. Students prepare for the American Registry of Radiologic Technologists certification examination and New York State licensure. Graduates have a 96.5% pass rate on the national certification examination over the last three years, with scores above the state and national averages.

The degree prepares students for immediate employment in radiography in areas such as, radiologic technologist, magnetic resonance imaging technologist, cardiovascular interventional technologist, and CT technologist.

This program is fully accredited by JRCERT, the Joint Review Committee on Education in Radiologic Technology. JRCERT is recognized by the U.S. Department of Education as the national accreditation agency of programs for the radiographer.

Surgical Technology

As members of the operating room team, surgical technologists work under medical supervision to help make operations safe and effective. This program prepares graduates to enter the field with confidence, hands-on clinical training, and the skills they need for immediate workplace success. It teaches students how to ensure that equipment functions properly, and that operations are performed under conditions that maximize patient safety.

Surgical technology is evolving quickly. This field offers exciting new challenges as surgical procedures and medical technologies change. After students earn their associate degree and pass the national certification examination, they are eligible to apply for jobs as a surgical or operating room tech.

The Monroe Community College Surgical Technology program is accredited by the Commission on Accreditation of Allied Health Education Programs upon the recommendation of the Accreditation Review Council on Education in Surgical Technology and Surgical Assisting.

Addictions Counseling - Certificate

With an Addictions Counseling certificate, students fulfill state requirements for a Credentialed Alcohol & Substance Abuse Counselor-in-Training (CASAC-T) license. This is the first step toward earning a full CASAC, which qualifies students for employment as a substance abuse counselor in New York State.

Designed for students who already hold a bachelor's or master's degree in a field related to addictions counseling (such as social work), the certificate offers specialized training. This 18-month program includes an addictions counseling internship that provides students with 300 hours of practical, supervised field experience. Students develop practical skills such as:

- Intake screening
- Treatment planning
- Crisis intervention
- Case management
- Referral and consultation with health professionals
- Legal aspects of addiction counseling

Students take seven specialized courses in alcohol and chemical dependency counseling, plus Introduction to Human Services and Human Services Field Work. New York has a shortage of well-trained addiction counselors, so students enjoy many career opportunities by qualifying for a CASAC-T license and working toward the full CASAC license.

Advanced Studies - Certificate

Students in the Advanced Studies program gain admission into Monroe Community College's Honors Institute, both of which provide students with special opportunities to encounter people, places, events and ideas.

The advanced studies certificate is not a stand-alone credential. Students earn it alongside their associate degree, and receive a SUNY-registered Certificate in Honors Studies. Graduation with the certificate requires full engagement with Honors Institute activities and a cumulative GPA of 3.5 or above. The advanced studies certificate program is not financial aid eligible.

Agriculture & Food Studies - Certificate

The Agriculture and Food Studies certificate provides hands-on training in the skills that are most needed by employers in agriculture, food processing, food safety, and related industries. This innovative program – developed in collaboration with local industry partners – prepares students for careers in farm management, food science, and technical product development.

The program is offered through MCC's state-of-the-art Agriculture and Life Sciences Institute (ALSI), and combines hands-on experience and classroom instruction. Students build the skills they need to land jobs (and earn promotions) with many employers in this agriculturally rich region.

Automotive Technology - Certificate

As auto technology gets more complex, the demand for highly skilled automotive technicians continues to increase. The two-year Automotive Technology certificate program offers students a convenient, affordable way to build the skills employers are looking for. Through a combination of classroom instruction and hands-on training, students develop the knowledge and experience they need to enter the work force with confidence.

Students learn about all major automotive systems, dividing their time between the classroom and hands-on laboratories. Students gain skills and experience in these areas:

Computer technology
Steering & suspension

Electrical components
Heating & air conditioning

Emissions controls

As students complete each course, they build credits that can eventually put toward an automotive technology associate degree.

This two-year program offers a streamlined path into the workforce. Designed for students who are currently employed or seeking to enter the work force quickly, they are soon qualified for jobs. In addition to coursework, students participate in a co-op seminar to prepare them for in-garage work experience. The program offers credit-bearing courses that can be used toward an associate degree in automotive technology at MCC.

Computer-Aided Design & Drafting - Certificate

Industrial designers use powerful desktop computers to generate three-view drawings and create 3D prototypes and models. They save their files on the cloud, then share them on their smartphones. With a Computer-Aided Design and Drafting certificate from Monroe Community College, graduates are able to join this exciting new world.

Computer-aided design and drafting, or CADD, plays a vital role in a wide range of industries, including:

Architecture
Interior design
Robotics

Automotive
Landscaping
Civil engineering

Movie animation

The certificate prepares students for entry-level employment in the dynamic CADD field. They learn the fundamentals of:

Geometric creation interfaces
Design analysis

Geometric data management
Rapid prototyping

Manufacturing process
Design optimization

All of the CADD courses meet national standards for drafting and geometric dimensioning and tolerancing (GDT). Students are well prepared for modern manufacturing and assembly processes.

Culinary Arts - Certificate

In the Culinary Arts certificate program, students gain the skills to start their career in the thriving food industry. They learn the latest cooking techniques in both the classroom and state-of-the-art kitchen. Upon completion, graduates are in demand anywhere great food is prepared – from restaurants to resort to food trucks. Or, students may choose to transfer their credits to MCC's hospitality management associate degree program and expand their career options further.

Graduates have a strong foundation in proper food handling, measuring, and different cooking techniques. They also gain valuable experience in menu planning and making healthy, high-quality food choices. This curriculum is designed to allow students to thrive on the job or transfer seamlessly to an associate degree program in hospitality management.

Cybersecurity - Certificate

The one-year Cybersecurity certificate provides students the skills and expertise necessary to find jobs in this rapidly growing field. Students develop the ability to identify security risks, assess threat levels, develop effective security countermeasures, and protect sensitive computer data.

The program provides students with extensive hands-on training in cybersecurity. They work directly with state-of-the-art computer hardware and software, while taking courses that parallel the excellent training program developed by the SysAdmin, Audit, Network, and Security (SANS) Institute.

Students gain a broad foundation of cybersecurity skills in this one-year program, enabling them to seek employment with any organization that needs to protect sensitive computer data.

Graduates of the cybersecurity certificate program are well prepared for the Global Information Assurance Certification (GIAC) examinations.

Dental Assisting - Certificate

In just one year, graduates can begin a career in dentistry. The Dental Assisting certificate program offers the comprehensive training needed for entry-level positions in private practice, clinics, and hospitals. Students learn the many skills valued by dental care providers today, such as, chairside assisting, laboratory procedures, and office procedures.

This accredited program prepares students to take the National Certification Exam offered by the Dental Assisting National Board, or a New York State specific exam. The one-year dental assisting program includes lectures and laboratory coursework, hands-on clinical experience and formal clinical internships, offering excellent preparation for entry-level employment within the dental industry. Students learn to collect patient histories, take vital signs, pre-fit provisional crowns, take X-rays, and assist with orthodontics.

The dental assisting program is highly competitive. Once a student becomes enrolled, they have the option to apply for admission into MCC's dental hygiene program for the following year or prepare to start their career.

Dental Assisting Rapid Track (“DART”) - Certificate

This program is a smart way to complete the training students need for licensure in one of New York State's fastest growing professions. Under the sponsorship of a practicing dentist, students learn on the job, and take classes online. They develop advanced skills in:

Chairside dental assisting procedures
Manipulation of dental materials
Laboratory procedures

Radiographic techniques
Specialty assisting procedures
Infection control procedures

They also study relevant biomedical science, oral histology and embryology, pathology, therapeutics, and the legal and ethical aspects of dentistry. Focusing on patient care, they take coursework in oral and written communications, and behavioral concepts.

The D.A.R.T. program is open to currently employed dental assistants. They complete at least 500 hours of relevant clinical experience with their sponsoring dentist as part of the program.

Direct Disability Support Services - Certificate

With a Direct Disability Support Services certificate, students get the skills and training they need for the best jobs in supporting individuals with disabilities. Whether students are already employed in disability services or are looking to enter the field, the certificate provides them with the training and credentials they need to increase their income and improve their job security.

The one-year certificate emphasizes practical training and workforce readiness. Students learn from experienced disability support professionals, developing skills that help them stand out in the disability services job market. The program teaches students to:

- Assess the needs of clients
- Maintain proper documentation
- Practice professional ethics

- Develop individualized disability support plans
- Communicate effectively with people with disabilities

The certificate includes two professional internships. Students get more than 100 hours of practical workplace experience at a nonprofit, government agency, community center, or related organization that provides services to individuals with disabilities. These internships enable students to build their resume, gain professional references, and develop a professional network in the disability services community.

Graduates can use the credits from their certificate as the foundation of an associate's degree in human services or a related field.

Early Care - Certificate

The Early Care certificate program offers specialty training within the college's highly-regarded education department. In one year, students take the coursework and learn the skills they need to make a big difference in young lives, as they work with children in preschool and pre-kindergarten settings. Graduates find rewarding positions in a number of environments, including child care centers, family child care homes, in-home care, and private preschool programs.

In the program, students gain skills in early care education, child growth and development, and planning and implementing curriculum for young children. Upon completion of the program, graduates are well-prepared for positions in child care classrooms, as well as home-based or center-based child care facilities – and they may qualify for further advancement in the field. Job titles include child care aid, preschool teacher, child care practitioner, and nanny. Graduates may also choose to transfer their credits to one of MCC's associate degree programs in teacher education.

MCC created this certificate program in conjunction with the Child Care Council and NYSAEYC, and it meets the education coursework requirements for either the Child Development Associate Credential™ (CDA) or the Infant-Toddler Care and Education Credentials.

Electronics Technology - Certificate

The Electronics Technology certificate program prepares student for rewarding careers in computer electronics. Students are challenged in the classroom and lab so they are invaluable to a wide range of employers.

The program takes students through the theories and applications of electronics with courses in computer applications for technicians, circuit analysis, and technical mathematics. They also learn the importance of teamwork and critical thinking in every engineering project.

Emergency Medical Services - Certificate

The Emergency Medical Services certificate program offers the professional preparation students need to become certified as a New York State Emergency Medical Technician (EMT). The program provides exceptional classroom and field training by experienced professionals and preparation for advancement to paramedic-level training. The program also allows current professionals to expand their skills and prepare for advancement. MCC is recognized by the Department of Health as an authorized sponsor of EMS Certification Programs.

Through classroom learning, labs and simulated emergency situations, students develop knowledge and skills to deliver pre-hospital emergency medical care. Students learn to perform comprehensive patient assessments, deliver life-saving interventions according to protocols, manage patient care while providing safe transportation to appropriate facilities, and communicate effectively with people at the scene. Students may also focus on paramedic candidate preparation, emergency medical services management, or tailor the program to meet their individual goals to qualify for professional positions.

Food Management - Certificate

Through a combination of classroom and hands-on food labs, students learn skills in all areas of food service management. They become pros at different cooking techniques and safe food handling. Students also learn about current trends in food service and menu planning. They practice the fundamentals of cooking in our professional kitchen, and learn these essential food management skills:

- How to supervise employees in a hospitality environment
- Food purchasing
- Basic accounting
- Food storage and handling

Graduates may choose to transfer their food management certificate credits to MCC's hospitality management associate degree program to continue their studies.

Geospatial Information Science & Technology (“GIST”) - Certificate

Geospatial Information Systems Technology (G.I.S.T.) is used virtually everywhere. It converts remote sensing information provided by satellites and imagery into digital data: data that helps drivers find their destinations, warns us of approaching storms, locates energy resources, tracks global warming and provides intelligence for national security. The ability to collect and analyze geospatial data is a valued skill set for businesses, urban planning, agriculture, scientific research, the military and a wide-range of organizations throughout the world.

Through classroom and computer lab experiences, students learn to use specialized program software to collect, convert, and integrate geographical data into digital form. They become proficient at using geospatial data to produce data layers, maps, tables and reports.

Golf Management - Certificate

This program introduces students to the business aspect of the golf industry. The curriculum covers specific instruction on the rules of golf, design, fitting and repair of equipment, and golf course maintenance. Students also learn golf shop policies and services, human resource management, and entrepreneurial studies, giving them a broader understanding of the business aspect of the golf industry. Graduates establish a basis for a career within the various elements of the game of golf. Completion of the program qualifies graduates for entry level positions in the golf industry.

* This program was deactivated in Spring 2018.

Heating, Ventilation & Air Conditioning - Certificate

Students gain timely, hands-on training as part of the Heating, Ventilating, Air Conditioning certificate program. This program introduces students to green technologies such as solar. Students work in state-of-the-art labs designed and built by Siemens Energy Management. They build in-demand skills that can help them get started in the workforce – or spark professional growth if they are already employed as an HVAC technician.

In the program, students get practical training on the essentials of motors, electronics, pumps, ventilation, and refrigeration. The heating, ventilation & air conditioning program is designed for students seeking entry-level positions as preventative maintenance mechanics or installation/service technicians, as well as for HVAC professionals who want to enhance their skills and job prospects.

Graduates can go on to specialize with a solar thermal technology certificate or continuing their studies in the air conditioning technology: heating & ventilation associate degree program.

Human Services - Certificate

Human services professionals serve clients in many kinds of social service organizations and rehabilitation centers, including hospitals, schools, nursing homes, probation departments, and child protection agencies. With a certificate in Human Services, students gain the knowledge and career-building skills they need for a variety of entry level positions – or advancement in their current job. Job titles could be family support worker, youth worker, social and human service assistant.

Students gain valuable field experience and take courses based on guidance from local human service agencies. The program is designed for students who want to learn the skills and attitudes needed for employment or promotion in a human services organization.

This program requires completion of three seminar courses in human services and the field work that accompanies each of these seminars, plus six credit hours of human services electives.

Students may choose to continue their studies and apply their credits toward an A.A.S. or A.S. in Human Services or an A.S. in Liberal Arts and Sciences: General Studies.

Mathematics - Certificate

The Math certificate is not a stand-alone program. By combining the certificate with another academic degree program at MCC, students strengthen their preparation for bachelor's degree programs and the job market.

The program covers subject matter that's equivalent to the first two years of a bachelor's degree in math or a related field. Students study subjects such as calculus, statistics, and linear algebra, enabling them to demonstrate a high level of math knowledge when transferring to a four-year school.

Mechatronics - Certificate

Our Mechatronics certificate combines the principles of electrical-mechanical and computer control used by highly-skilled maintenance technicians working in automated manufacturing. Because many of these technicians will be retiring in the coming years, job prospects are excellent!

Through MCC's Mechatronics certificate, students learn the most current processes and techniques, work on new, high-tech equipment, and participate on team projects that simulate industry scenarios.

The program weaves classroom learning with hands-on experience in the operation and maintenance of electro-mechanical-computer controlled systems found in today's automated manufacturing environments. Through MCC's reputation for excellence in technical education and our partnerships with industry leaders graduates more than ready for this growing job market.

Office Technology: Medical Office Assistant - Certificate

The Office Technology: Medical Office Assistant program responds to specific employer needs. Students learn specialized health care record-keeping procedures and use the same state-of-the-art computer systems found in today's health care industry.

The one-year program provides students with a strong foundation to perform well in a medical office environment. Students develop skills in word processing and transcription, and learn to communicate effectively with patients as well as other health care professionals. In addition, students take introductory courses in medical areas such as, biology, medical terminology, drugs, and emergency care.

With strong technical and communication skills, students are ready to shine in the growing health care industry.

Optical Systems Technology - Certificate

This program prepares students to work in optical activities, such as testing, quality control, and production. It provides a background in optics using the eye as a detector, but not incorporating the peripheral disciplines, such as electronics and photography, as offered in the A.A.S. curriculum in Optics.

This certificate program is designed for people working in the field or an allied field who wish to add optics to their sphere of competence. All courses shall be applicable to the A.A.S. degree should the student wish to continue his/her education in Optical Engineering Technology.

Paralegal Studies - Certificate

In the Paralegal Studies certificate program, students learn about the preparation of legal documents, the investigation of facts, and how to work effectively with attorneys and clients. The curriculum was developed in partnership with the Monroe County Bar Association and the Paralegal Association of Rochester. It is approved by the American Bar Association.

The program prepares students for entry level employment as paralegal professionals. The curriculum includes studies in:

- | | |
|--------------------------------------|--|
| New York law | Ethics and professional responsibility |
| Procedural applications of the law | Computer application in the law |
| Client satisfaction through teamwork | |

During the program, students learn to:

- Identify legal concepts and their practical applications
- Deliver effective oral and written communication
- Use technology for research
- Apply analytical thinking skills in legal contexts

Students entering this program have already earned a bachelor's degree or an associate degree with at least 18 credits in liberal arts courses plus significant work experience in finance, government, insurance, and other law-related environments. Paralegals are in demand in all areas where legal work is performed, including private law firms, government agencies, insurance companies, and corporations

Paramedic - Certificate

The Paramedic certificate program prepares students for a career where they are part of a life-saving team. Upon completion, it also prepares graduates for their next key step: admission to the New York State Health Department examinations for certification as a paramedic. Once graduates become state certified they are eligible for entry level positions in the field or to apply for admission in MCC's highly-regarded Paramedic associate degree program and more career advancement opportunities.

The course sequence provides classroom, hands-on skill development, hospital clinical experience and field internship experiences. This program includes only the courses and training required for admission into the New York state Department of Health Paramedic certification exams. The program is accredited by the Commission on Accreditation of Allied Health Education Programs.

Precision Machining - Certificate

Monroe Community College has one of the best-equipped college Machining programs in New York State. In this program, students learn the principles and practices of precision metalworking. The program is designed to prepare students for immediate employment in the precision machining industry. Many fields depend upon highly skilled machinists, including automotive, aerospace, military, and medical.

Graduates may be interested in continuing with a two-year Precision Machining associate degree or the Apprentice Training & Machine Trades program.

Precision Tooling - Certificate

This certificate program is designed to prepare graduates for employment in the precision metal-working industry in Monroe County and the Finger Lakes Region of New York State. Included in this certificate is the course work and hands-on skills development necessary to enter apprenticeship programs in mold making, machine building, tool and die making, or employment in production machining. Students enrolling in this program can also prepare for majors in the mechanical, quality, or manufacturing programs offered at Monroe Community College.

All TAM courses are approved as technical related instruction by the Bureau of Apprenticeship Training and used by the area's local manufacturers as a means of educating current employees. Students interested in this program may also be interested in the Apprentice Training: Machine Trades program.

Small Business Management - Certificate

The Small Business Management certificate is designed for business owners, entrepreneurs thinking about starting a business, and current small business professionals. Students study accounting concepts that are key to making good business decisions, create a business plan that gives the company a sound foundation and a competitive edge, and practice leadership and team building skills that are important to long-term success.

This program provides key foundations in accounting, marketing and sales, managing employees and vendors, and customer service. With the small business savvy gained in this program, students could take one of these big steps:

- Start a new business selling goods or professional services
- Expand or diversify a current business
- Join or lead a family business
- Start a venture capital group within an established organization

Graduates may choose to continue their studies and transfer credits from this program to an associate degree in entrepreneurial and applied business studies.

Solar Thermal Technology - Certificate

In the Solar Thermal Technology certificate program, students develop practical, cutting-edge skills that impress employers in the fast-growing solar energy industry.

Students get a learning opportunity they can't get anywhere else: hands-on experience in the Solar Thermal Auxiliary Resource (STAR) Lab. Built by students for students, this 40-foot-high outdoor lab simulates an actual rooftop panel installation. The solar thermal certificate program is designed for students who seek to enter the solar-energy industry as installers and service technicians, and for people already working in heating, ventilating, and air conditioning who want to improve their job skills.

Students get the hands-on training necessary to install and work with solar thermal systems, along with classroom instruction that covers the fundamentals, such as:

- Solar heat collection and transfer
- Building codes
- Principles of solar thermal systems

Students can get solar thermal training as a stand-alone certificate or as part of the heating, ventilating, & air conditioning (HVAC) associate degree program. After earning the certificate, students are prepared to pass the North American Board of Certified Energy Practitioners (NABCEP) Solar Thermal Entry Level Certification Exam.

Sustainability - Certificate

Depending on their interests and career goals, students choose at least one course in each of three core areas – humanities, natural science, or social science. A certificate in sustainability studies is a smart addition to many of MCC's associate degree programs – especially transfer programs that prepares students for careers in education, law, geo-sciences, business and more.

A Sustainability Studies certificate gives students a unique advantage in fields like:

Architecture
Meteorology
Energy Conservation
Business (Domestic and International)

Geology
Manufacturing
Government
Urban Planning

Law
Agriculture

Teaching Assistant: Adolescence - Certificate

The Teaching Assistant: Adolescence certificate is designed for students interested in teaching adolescents and who would like to start their teacher education gradually. Students learn the fundamentals of teaching in the classroom, while taking courses that balance education classes, general education, and electives. The program fulfills the college credit hour requirements for New York State level II, III and pre-professional teaching assistant certificates.

In this program, students work directly with adolescent students in actual classrooms to develop their professional skills. First teaching positions could include teaching assistant, classroom assistant, teacher's aide, or school tutor. The certificate also gives students the option to transfer into the adolescence education associate degree program, leading to a bachelor's degree and New York State teacher certification.

NUMBER AND PERCENT OF TOTAL EMPLOYED FULL-TIME IN FIELD	1 (100%)	N.A.	N.A.	N.A.
NUMBER CONTINUING THEIR EDUCATION FULL-TIME	0	N.A.	N.A.	N.A.
NUMBER EMPLOYED / CONTINUING THEIR EDUCATION PART-TIME	0	N.A.	N.A.	N.A.
NUMBER AVAILABLE FOR EMPLOYMENT	0	N.A.	N.A.	N.A.
NUMBER OTHER*	0	N.A.	N.A.	N.A.
MEDIAN POST-GRADUATION WAGES**	N.A.	N.A.	N.A.	N.A.

The information in the table is unduplicated. That is, graduates who are counted in one category (e.g., "Number Continuing Their Education Full-Time") are not counted in other categories (e.g., "Number Employed Full-Time").

N.A. - Information Not Available.

** Includes those with no further education and whose employment is unknown.*

*** This data comes from SUNY and shows post-graduation wages in any field regardless of full- or part-time employment. The data shown in the 2019 column is for 2016-17 graduates and their 2017-18 earnings. The other years follow suit. Data is not available if fewer than 10 graduates per program found employment.*

Travel & Tourism - Certificate

This program is designed for students who are primarily interested in a travel and tourism concentration without the broad liberal arts background. Graduates of this program have established a basis for a career in the travel and tourism industry, and are qualified for at least entry-level positions in tour companies, travel agencies, tourism bureaus, cruise lines, car rental companies, and hotels.

Monroe Community College prohibits discrimination based on race, color, religion, sex, sexual orientation, pregnancy, familial status, gender identity or expression, age, genetic information, national or ethnic origin, physical or mental disability, marital status, veteran status, domestic violence victim status, criminal conviction, or any other characteristic or status protected by state or federal laws or College policy in admissions, employment, and treatment of students and employees, or in any aspect of the business of the College. Inquiries regarding the application of Title IX and other laws, regulations and policies prohibiting discrimination may be directed to MCC's Civil Rights Compliance Coordinators: Shannon Glasgow, coordinator (585-292-2108/sglasgow@monroecc.edu) or Melissa Fingar, Esq., assistant coordinator (585-292-2117/mfingar@monroecc.edu) at Monroe Community College, 1000 East Henrietta Road, Rochester, NY 14623.
