

Tuberculosis Screening & Consent International and Human Services Students

Student Name: _____ M00: _____

The American College Health Association recommends that high-risk individuals be screened for tuberculosis, a serious lung infection, within three months prior to college entrance or as soon as possible afterwards. The purpose is to identify persons with TB disease (active TB) or latent TB (inactive infection). Both forms of TB require treatment. The Monroe County Health Department and MCC Student Health Services recommends screening of:

- Persons who have lived, within the past 5 years, in countries where TB is common. It is easier to list those countries where TB is uncommon, rather than common. Students from the following countries where TB is uncommon, and who have *no other risk factors*, do not need TB screening.
 - American Region: Canada, Jamaica, St Kitts and Nevis, St Lucia, USA, Virgin Islands (USA)
 - European Region: Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Malta, Monaco, Netherlands, Norway, San Marino, Sweden, Switzerland, United Kingdom
 - Pacific Region: American Samoa, Australia, New Zealand.

Students from any country not listed above should complete this screening form.
- Students who need a TB test to participate in field work in Human Services at MCC.

1. Have you had any of these symptoms during past year (please check all that apply):

Unexplained Tiredness	Coughing Up Blood	Unexplained Fevers
Sweating at Night	Cough Lasting Three or More Weeks	Unintentional Weight Loss

2. TB Risk Assessment – have you ever:

Had close contact with a person with active TB?	Yes	No	
Been told that your immune system does not work well?	Yes	No	
Had the vaccine “BCG”?	Yes	No	Unsure
Had a TB skin test (PPD) before?	Yes	No	Unsure
Been diagnosed with active or inactive TB?	Yes	No	
Taken medicine for TB?	Yes	No	
If you took TB medicine, did you complete the medication?			Yes No
If female, are you pregnant?	Yes	No	

3. PPD skin tests can be placed on Monday, Tuesday, Wednesday & Friday, 9am-3:30pm (no placements on Thursdays). You must return for the skin test read within 48 to 72 hours after the test is placed. Visits for reads can be done Monday- Friday.

I have answered the above questions and attest to the truthfulness of my responses. I consent to (PPD) Tuberculin Skin Testing at MCC Health Services, if indicated. I understand I should not have a skin test if I have had a positive test in the past. I authorize that PPD, TB screening and chest x-ray results, and health clearances may be shared between MCC Health Services and the Monroe County Health Department TB Clinic, if necessary.
